on april 6 2006 the national highway traffic safety administration nhtsa released a final rulemaking for sport utility vehicles suvs and light duty

trucks beginning with model year my 2008 the rule restructures the corporate average fuel economy cafe program for light trucks to establish standards based upon vehicle size as opposed to the current program with one average standard for all light trucks it marks a significant change to the cafe program for trucks the sharp rise in gasoline prices during spring 2006 focused attention on the cafe standards for passenger cars and the fact that nhtsa does not have the same latitude to make changes to passenger car cafe or the passenger car cafe program for trucks the agency established two different tracks that manufacturers can follow for model years 2008 2010 meeting an unreformed or reformed cafe standard in my2011 all manufacturers will have to meet the reformed standard the unreformed light duty truck standards are a fleetwide average of 22 5 23 1 and 23 5 mpg for model years 2008 2009 and 2010 respectively manufacturers opting for the reformed standard will be required to meet a range of standards depending upon vehicle size starting in my2011 the reformed light truck cafe standards with a range of 21 8 to 30 4 mpg will apply to all manufacturers nhtsa estimates that under the reformed system light trucks will average 24 0 mpg in my2011 on april 27 2006 president bush requested that congress grant him authority to increase passenger car cafe standards and to establish an attribute based system for passenger cars however the 109th congress did not grant this authority the energy policy and conservation act epca of 1975 grants nhtsa the authority to alter the light truck program s structure but the passenger car program is set by epca to increase passenger car cafe above the current 27 5 mpg the president must submit the proposal to congress which can then act to disapprove otherwise the proposal goes into effect further under epca nhtsa lacks the authority to alter the structure of the passenger car program as part of the administration proposal the president also requested the authority to allow credit trading between different manufacturers currently manufacturers may bank credits for future years but may not trade them to other manufacturers others proposals within and outside congress include simply raising fuel economy standards for passenger cars and light trucks eliminating the distinction between the two fleets and establishing a system to trade cafe credits among manufacturers as noted above the original authorities for the cafe program were enacted as part of the energy policy and conservation act of 1975 p l 94 163 epca passed in 1975 as a response to the arab oil embargo the energy policy act of 2005 p l 109 58 passed on august 8 2005 authorizes 3 5 million annually for five years for nhtsa to carry out fuel economy rulemakings requires a study to explore the feasibility of a significant reduction in fuel consumption by 2014 and requires that the adjustment factor applied to estimate consumer in use fuel economy be revised this crs report replaces crs issue brief ib90122 automobile and light truck fuel economy the cafe standards this report supersedes crs report rl33413 automobile and light truck fuel economy the cafe standards by brent d yacobucci and robert bamberger
