great advances have been made in understanding hearing in recent years in particular the mechanical function of the cochlea has become the focus of intense interest this started in one direction with the discovery of otoacoustic emissions in 1978 which required active mechanical amplification processes as first postulated by gold in 1948 direct evidence for the role of this mechanism in sharpening up the otherwise poor basilar membrane tuning properties was provided in 1982 and in 1983 motility was shown in outer hair cells in parallel an immense amount of work has been done on the electrophysiology of hair cells following the first intracellular recordings in 1977 over a longer time scale models of basilar membrane motion have been developed and refined and recently much effort has been put into incorporating active mechanisms and non linear processes it seemed an opportune time to bring together the leading workers in

these various areas to take stock of the whole field and to stimulate further progress this book represents the proceedings of a nato arw on the mechanics of hearing held at the university of keele 3 8 july 1988 the conception of the meeting owes much to earlier meetings held in boston in 1985 peripheral auditory mechanisms eds j b allen j l

the chemistry of heterocyclic compounds since its inception has been recognized as a cornerstone of heterocyclic chemistry each volume attempts to discuss all aspects properties synthesis reactions physiological and industrial significance of a specific ring system to keep the series up to date supplementary volumes covering the recent literature on each individual ring system have been published many ring systems such as pyridines and oxazoles are treated in distinct books each consisting of separate volumes or parts dealing with different individual topics with all authors are recognized authorities the chemistry of heterocyclic chemistry is considered worldwide as the indispensable resource for organic bioorganic and medicinal chemists

this ebook is a collection of articles from a frontiers research topic frontiers research topics are very popular trademarks of the frontiers journals series they are collections of at least ten articles all centered on a particular subject with their unique mix of varied contributions from original research to review articles frontiers research topics unify the most influential researchers the latest key findings and historical advances in a hot research area find out more on how to host your own frontiers research topic or contribute to one as an author by contacting the frontiers editorial office frontiersin.org about contact

papers presented to j e littlewood on his 80th birthday issued as 3d ser v 14 a 1965

this book contains 112 papers selected from about 250 submissions to the 6th world congress on global optimization wngo 2019 which takes place on july 8 10 2019 at university of lorraine metz france the book covers both theoretical and algorithmic aspects of nonconvex optimization as well as its applications to modeling and solving decision problems in various domains it is composed of 10 parts each of them deals with either the theory and or methods in a branch of optimization such as continuous optimization dc programming and dca discrete optimization network optimization multiobjective programming optimization under uncertainty or models and optimization methods in a specific application area including data science economics finance energy water management engineering systems transportation logistics resource allocation production management the researchers and practitioners working in nonconvex optimization and several application areas can find here many inspiring ideas and useful tools techniques for their works

this book is a dedicated text to learn pathologic images seen during eus the digital anatomy correlation used in this work is the natural continuation of efforts to apply the university of colorado visible human data set to gastroenterology the visible human data set was created by dr vic spitzer and colleagues at the university of colorado and is currently housed at the universitys center for human simulation the data set consists of

high resolution transaxial digital images captured as cadavers were abraded away at 1 mm or less depths these images are compiled into blocks of data and each structure is identified this information can be used to pull out and manipulate 3 d structures as well as allowing one to review planar anatomy in any orientation using the visible human dataset one should be able to find a normal anatomy correlate to any image found during a eus examination however as important as normal anatomy is it is the abnormal features which are the crux of an eus examination endosonographers are asked to define lumps bumps cysts to find correlates for symptoms and abnormal laboratory findings accuracy requires a tremendous amount of skill and experience to help in this task we have assembled chapters from a world wide group of expert endosonographers these authors have shared their insight and images to help the readers of this work better see and understand some of the complexities uncovered during a eus evaluation dvd showing techniques for removal of human temporal bones

the working group i contribution to the sixth assessment report of the intergovernmental panel on climate change ipcc provides a comprehensive assessment of the physical science basis of climate change it considers in situ and remote observations paleoclimate information understanding of climate drivers and physical chemical and biological processes and feedbacks global and regional climate modelling advances in methods of analyses and insights from climate services it assesses the current state of the climate human influence on climate in all regions future climate change including sea level rise global warming effects including extremes climate information for risk assessment and regional adaptation limiting climate change by reaching net zero carbon dioxide emissions and reducing other greenhouse gas emissions and benefits for air quality the report serves policymakers decision makers stakeholders and all interested parties with the latest policy relevant information on climate change available as open access on cambridge core
