the writing of science in the period 1580 1700 is artfully diffidently carelessly boldly and above all self consciously literary the poetics of scientific investigation in seventeenth century english literature considers the literary textures of science writing its rhetorical figures neologisms its uses of parody romance and various kinds of verse the experimental and social practices of science are examined through literary representations of the laboratory of collaborative retirement of virtual epistolary conversation and of an imagined paradise of investigative fellowship and learning claire preston argues that the rhetorical generic and formal qualities of scientific writing are also the intellectual processes of early modern science itself how was science to be written in this period that question which piqued natural philosophers who were searching for apt conventions of scientific language and report was initially resolved by the humanist rhetorical and generic skills in which they were already highly trained at the same time non scientific writers enthralled by the developments of science were quick to deploy ideas and images from astronomy optics chemistry biology and medical practices practising scientists and inspired laymen or quasi scientists produced new adjusted or hybrid literary forms often collapsing the distinction between the factual and the imaginative between the rhetorically ornate and the plain early modern science and its literary vehicles are frequently indistinguishable scientific practice and scientific expression mutually involved among the major writers discussed are montaigne bacon donne browne lovelace boyle sprat oldenburg evelyn cowley and dryden

practice some of which is translated into the standard forms of public discourse in publication and then retranslated by readers and adapted again to local practice at self selected other sites less may be left implicit and additional personal and contextual information is carried by the informal methods of communication which mediate local projects and international publication but both methods of communication are screens as well as conduits of information history and background of the volume when the planning of this volume began in the spring of 1977 it seemed a natural part of the mandate for the yearbook there had also been a number of more specific calls for deeper studies of research in social and historical context 3 these calls can be seen as giving permission and legitimacy to ask questions otherwise seen as irrelevant or even disrespectful and as attempts to develop new perspectives from which to ask and to answer them the implied and expressed irreverence toward traditions and institutions of great respect may have prolonged this process of initial apologetics in any case in may 1977 the theme of the social process of scientific investigation was proposed to the editorial board for volume iv as the heart of the subject that is the ethnographic and detailed historical study of actual scientific activity and thinking at or close to the work site

this book showcases a case study of the development of a generalist early childhood education ece teacher into a confident and competent teacher of science in early childhood

with support from a mentor it argues that with guided mentoring and later timely support of a mentor as and when required ece teachers can deliver the curriculum teach science by providing opportunities to explore and then build on children s interest through intentionally planned activities dialogue and discourse it presents a comprehensive literature review and research design including theoretical frames and methodology it includes a chapter on teacher development and discusses different approaches to science investigations practiced by the teacher in the case study the book provides evidence of children s science learning and presents the findings as response to research questions it also includes a model of teaching as inquiry in the context of early childhood education

this book presents the findings of a case study conducted in a māori medium school where a space was created for pūtaiao western science teaching and learning from year 1 to 13 science is currently taught in te reo māori in primary school and in english in secondary school and evidence suggests that students are engaging in science education learning to investigate and achieving in science in new zealand most students attend english medium state schools however approximately 15 of indigenous students attend māori medium schools these schools are underpinned with kura kaupapa māori philosophy which is culturally specific to māori and aims to revitalise the māori language and māori knowledge and culture māori students engagement and achievement continues to be a challenge for both mainstream and māori medium schools teachers and students due to lack of access to science teachers who can teach in te reo māori school leaders and whanau families believed that by year 9 age 13 their students had developed their identity as māori and were proficient in te reo māori they wanted their students to have the option to learn science experience success and have the choice to continue in science so they made the difficult decision for science to be taught in english in secondary school the book discusses how teachers in indigenous schools who have extensive knowledge of culture and context specific pedagogies can gain confidence to teach science through collaboration with and support from researchers with whom they have developed strong professional relationships
