in a 13 page preface smith lays out a lengthy explanation of the origin and purpose of this catalogue of the moth family noctuidae in the united states in short he collected materials over a span of ten years for a monograph on noctuidae including material from books from philadelphia new york washington as well as purchasing subject papers when available his efforts included reviewing specimens within the national museum as well as trips abroad many of the individual species notes contain multiple bibliographic citations that are tersely abbreviated in the extreme fortunately mr smith has also provided an index to the authors and works cited to help decipher the citations

roger tory peterson had already made his mark with his innovative field guide when he conducted ddt research during world war ii his friend and fellow naturalist rachel carson built on these efforts and eventually wrote silent spring a landmark text that along with peterson s field guide jump started the modern environmental movement by combining the tireless observation of a scientist with the imaginative skills of an artist and writer peterson created a field guide that robert bateman in his foreword to the fifth edition says was the doorway for millions of people into the wonderland of natural history the peterson identification system has been used in the more than fifty books that make up the peterson field guide series peterson s magnum opus now in its fifth edition created the trail for countless field guides to follow they are still following year by year but his is the standard by which all other field guides are judged on the morning of july 28 1996 roger peterson was painting his final bird plate he died peacefully in his sleep later that day it is fitting that his final work a culmination of more than sixty years of observing painting and writing should be this one a revision of the guide that started his legacy
