this book documents my return to a topic that has always been one of my closest interests the systematic study of intellectual and political history i became involved in historical studies while in high school and continued this work during the years that i spent as a metalworker in a shipyard and in a factory indeed i succeeded in being admitted to the university of hamburg only after submitting a comparative analysis of the history of early greek and early western philosophy to the late professor g ralfs he gave me much encouragement and remained one of my main academic sponsors during the years in hamburg recently i translated into english the manuscript that had opened the doors of the university for me and extended it to the history of psychology the results present the unfolding of an intellectual theme as if it were an historical dialogue they chaps 10 and 11 are perhaps controversial achievements but they are among my proudest before i began my studies in psychology and philosophy i spent at most two years in physics and mathematics subsequently i began to approach psychology with a natural science emphasis even when i began to shift my attention from general experimental to developmental psychology especially gerontology i continued to maintain this orientation and deemphasized my historical interest this interest did not find any resonance in the developmental research and theory of these years anyhow

a penetrating analysis of the fundamental conceptual continuities and discontinuities that inform the history of psychology
