biometrics based authentication and identification are emerging as the most reliable method to authenticate and identify individuals biometrics requires that the person to be identified be physically present at the point of identification and relies on something which you are or you do to provide better security increased efficiency and improved accuracy automated biometrics deals with physiological or behavioral characteristics such as fingerprints signature palmprint iris hand voice and face that can be used to authenticate a person's identity or establish an identity from a database with rapid progress in electronic and internet commerce there is also a growing need to authenticate the identity of a person for secure transaction processing designing an automated biometrics system to handle large population identification accuracy and reliability of authentication are challenging tasks currently there are over ten different biometrics systems that are either widely used or under development some automated biometrics such as fingerprint identification and speaker verification have received considerable attention over the past 25 years and some issues like face recognition and iris based authentication have been studied extensively resulting in successful development of biometrics systems in commercial applications however very few books are exclusively devoted to such issues of automated biometrics automated biometrics technologies and systems systematically introduces the technologies and systems and explores how to design the corresponding systems with in depth discussion the issues addressed in this book are highly relevant to many fundamental concerns of both researchers and practitioners of automated biometrics in computer and system security

just as the universe provides light and heat from the sun in order for life to survive and flourish on our planet the universe also provides the basic energy out of which everything has come into existence and from which our further development can proceed we have always had the tools for transformation within our grasp and the fuel the energy that feeds the process is as open to us as the air we breathe all things that come into existence are formed from this energy which

of itself cannot be seen but which can be accessed entered into and physically felt in its various forms it provides the very substance out of which the material universe has come into being it is in fact everything that ever was everything that is everything that will ever be in one for it is the body you inhabit in another the thoughts that come bidden and unbidden into your mind it is the substance of life the energy of the universe the life force this energy itself is the connection for which we seek
