consensus is growing internationally that traditional command and control approaches to environmental regulation have borne much of their low hanging fruit yet it is far from clear what should complement or replace them regulatory agencies and policy makers are struggling with a lack of information about regulatory reform about what works and what doesn t and about how best to harness the resources of both government and non government stakeholders progress is being impeded unnecessarily by a lack of shared knowledge of how similar agencies elsewhere are meeting similar challenges and by a lack of data on the success or otherwise of existing initiatives despite recent and valuable attempts to deal with such problems in the european union and north america these remain islands of wisdom in a sea of ignorance for example when it comes to dealing with small and medium sized enterprises very little is known and what is known is not effectively distilled and disseminated much the same could be said about the roles of

third parties commercial and non commercial as surrogate regulators and more broadly of many current initiatives to reconfigure the regulatory state based on the authors work for the oecd victorian environmental protection authority and the western australian department of environment protection leaders and laggards addresses these problems by identifying innovative regulatory best practice internationally in a number of specific contexts evaluating empirically the effectiveness of regulatory reform and providing policy prescriptions that would better enable agencies to fulfil their regulatory missions focusing primarily on the differing requirements for both corporations and small and medium sized enterprises in north america and europe the book aims to complement existing initiatives and to expand knowledge of regulatory reform by showing how existing experience can best be put to practical use on the ground by drawing lessons from experiments in innovative regulation internationally by reporting and extrapolating on original case studies and by advancing understanding on which instruments and strategies are likely to be of most value and why the authors argue that the development of theory has outstripped its application in essence leaders and laggards aims to ground a myriad of theory on the reinvention of environmental regulation into practice the book will be essential reading for environmental policy makers regulatory and other government officials responsible for policy design and implementation academics and postgraduate students in environmental management environmental law and environmental policy and a more general readership within environmental policy and management studies it will also be of interest to those in industry such as environmental managers and corporate strategists who are considering the use of more innovative environmental and regulatory strategies and to environmental ngos

sustainable design for interior environments is the first comprehensive textbook on the subject and is intended for students and instructors as well as practicing designers architects contractors and facility managers with over 150 illustrations and interactive activities the text provides a complete overview of the principles and strategies for sustainable design

the publication of this handbook will be interested for everyone who will learn what the eu has done to protect the environment and to improve the quality of life in europe and what can be achieved in future well structured concise and forward looking the handbook describes the history and current status of eu environmental law but also looks to the future by analysing the strengths and weaknesses of the actions taken so far
