**Keyword Focus** HTML CSS web design web development frontend development website design basics HTML tutorial CSS tutorial responsive design website structure semantic HTML

**What is HTML** HTML HyperText Markup Language forms the skeleton of every website Its a markup language that uses tags to structure content These tags tell the browser how to display elements like headings paragraphs images and links Think of HTML as the blueprint of your website defining the content and its hierarchical relationship

**Example** This is a paragraph This simple code snippet uses the `<p>` tag to define a paragraph of text

**Importance of Semantic HTML** Modern web design emphasizes semantic HTML This means using tags that accurately reflect the meaning of the content not just its appearance For instance using `<h1>` for main headings `<h2>` for subheadings and `<div>` for independent pieces of content helps both browsers and search engines understand the websites structure improving SEO and accessibility

**Statistics** According to a study by W3Techs HTML5 is used by over 90 of all websites This underlines the languages dominance and the importance of mastering it

**What is CSS** CSS Cascading Style Sheets is the skin of your website Its a style sheet language that controls the visual presentation of HTML elements Where HTML defines what elements exist CSS determines how they look their color size position and more CSS separates content from presentation making websites easier to maintain and update

**Example** `p { color: blue; font-size: 16px; }` This CSS rule makes all paragraph text blue and 16 pixels in size

**CSS Frameworks and Preprocessors** To streamline the CSS development process many developers use CSS frameworks like Bootstrap and Tailwind CSS These frameworks offer pre built styles and components accelerating development

**Preprocessors** like Sass and Less add features like variables and nesting making CSS more organized and maintainable

**Combining HTML and CSS** A Powerful Duo HTML and CSS work together seamlessly HTML provides the structure and CSS styles it
