acupuncture in pregnancy and childbirth is a concise highly illustrated and practical guide to using acupuncture to treat women throughout their pregnancy and labour drawing on an unparalleled wealth of experience as a midwife and an acupuncturist the author has produced a book accessible to both acupuncture students and practitioners covering physiology related to pregnancy and childbirth illuminating links between western knowledge and acupuncture approaches and suggesting points and point combinations for particular stages and actions during pregnancy and labour highly illustrated with summary boxes and guidelines covers nutritional aspects of pregnancy gives practical advice and instruction on the use of acupuncture through the four trimesters of pregnancy and labour uses case examples to further illustrate the text covers recent advances in relation to the effects of aspirin and heparin to the immune system and pregnancy includes ivf pregnancies glossary and appendix of useful addresses fully updated and revised throughout to include recent research nutrition and its effect on the foetus new and developing area of research

traditions are dangerous doubly so in science traditions are unchanging science is about change this was the 4th international colloquium on carbohydrate metabolism in pregnancy and the newborn to be held in aberdeen and by now the form is set how much its content has changed is a matter of nice judgement and not under the control of the organizers it is not within their power to bring news of revolution if there has been no revolution certainly many of the speakers had kent faces from previous aberdeen meetings but so they would be at any meeting on diabetes anywhere in the world the written proceedings of scientific conferences have purposes other than to record changes sometimes they need to state a consensus the 3rd colloquium came to an agreement about the importance of prepregnancy recognition and control of abnormalities of carbohydrate metabolism the 4th set out to examine what results it had achieved much of this book is taken up with follow up studies of the applications of similar regimes in different parts of the world since the first aberdeen meeting in 1973 progress in the management of diabetic pregnancy has been slow and steady but the change in the city and the society where the meetings took place has been fast

second international colloquium on carbohydrate metabolism in pregnancy and the newborn 1978

this title is directed primarily towards health care professionals outside of the united states it takes a comprehensive look at the issues surrounding mental illness and pregnancy describing common disorders and their relationship with pregnancy it promotes an understanding of the issues involved and offers tools to providing the most effective woman centred maternity care all health professionals concerned with the wellbeing of the pregnant woman will find invaluable help and guidance in this book given the identification of mental health problems as a leading cause of maternal death cemd 2001 this is an essential guide to the effects of pregnancy and childbirth on women and families coping with mental illness
