Dr. Shinya again changes our view of what is possible in his groundbreaking new book *The Rejuvenation Enzyme*. Here, Dr. Shinya turns his visionary genius to solving the problem of aging cells. His conclusions will amaze you with their simplicity and insight as he shows you how you can create your own rejuvenation plan using techniques such as the little fast detox, massage, coffee enema, and Kangen water. In *The Rejuvenation Enzyme*, you will learn how rejuvenation enzymes transform zombie cells into healthy cells, how you can restore energy by clearing garbage from your cells, why purple food improves your memory, how drinking Kangen water supports your health and energy, why turmeric may prevent Alzheimer's disease. Dr. Hiromi Shinya, medical pioneer and inventor, developed the now standard technique of non-invasive colonoscopic surgery in his more than 50 years of practice. He was a professor of surgery at Albert Einstein College of Medicine and head of the Endoscopic Center of Beth Israel Hospital in New York, as well as an adviser for Maeda Hospital and Hanzomon Gastrointestinal Clinic in Japan. He was also vice chairman of the Japanese Medical Association in the USA.

Free radicals are constantly formed in living cells and removed by antioxidant defenses. Antioxidant enzymes are the main line of defense against free radicals in animal and plant cells. Uncontrolled generation of ROS are involved in a number of human disease states including diabetes and cancer due to disturbance in cellular and molecular processes including cell growth, differentiation, and proliferation. When cells are exposed to oxidative stress, a defense system endorses the expression and regulation of number of antioxidant enzymes as a defense mechanism to protect them from the damage induced by free radicals. Based on this fact, the book *Antioxidant Enzymes* was designed to overview the importance of the antioxidant enzymes in human and plant cells against toxic free radicals, their relationship with several pathophysiologic processes, and their possible therapeutic application.
