incorporating the thinking feeling and behaving dimensions of human experience corey s best selling theory and practice of counseling and pschotherapy 9e international edition offers an easy to understand text that helps students compare and contrast the therapeutic models expressed in counseling theories corey introduces students to the major theories psychoanalytic adlerian existential person centered gestalt reality behavior cognitive behavior family systems feminist and postmodern approaches and demonstrates how each theory can be applied to a single case stan with his trademark style he

shows students how to apply those theories in practice and helps them learn to integrate the theories into an individualized counseling style this book is the center of a suite of products that includes a revised student manual case approach to counseling and psychotherapy 2013 the art of integrative counseling 2013 and media resources like the dvds titled dvd for theory and practice of counseling and psychotherapy the case of stan and lecturettes and dvd for integrative counseling the case of ruth and lecturettes which features the same videos as the integrative counseling cd rom redesigned for today s classrooms

apply the major psychotherapy theories into practice with this comprehensive text counseling and psychotherapy theories in context and practice skills strategies and techniques 2nd edition is an in depth guide that provides useful learning aids instructions for ongoing assessment and valuable case studies more than just a reference this approachable resource highlights practical applications of theoretical concepts covering both theory and technique with one text easy to read and with engaging information that has been recently revised to align with the latest in industry best practices this book is the perfect resource for graduate level counseling theory courses in counselor education marriage and family therapy counseling psychology and clinical psychology included with each copy of the text is an access code to the online video resource center vrc the vrc features eleven videos each one covering a different therapeutic approach using real therapists and clients not actors these videos provide a perfect complement to the book by showing what the different theories look like in practice the second edition features new chapters on family systems theory and therapy as well as gestalt theory and therapy extended case examples in each of the twelve theory chapters a treatment planning section that illustrates how specific theories can be used in problem formulation specific interventions and potential outcomes assessment deeper and more continuous examination of gender and cultural issues an evidence based status section in each theory chapter focusing on what we know from the scientific research with the goal of developing critical thinking skills a new section on outcome measures that provides ideas on how client outcomes can be tracked using practice based evidence showcasing the latest research theory and evidence based practice in an engaging and relatable style counseling and psychotherapy theories in context and practice is an illuminating text with outstanding practical value

part i basic elements of group process an overview 1 introduction to group work 2 group leadership 3 ethical and professional issues in group practice 4 early stages in the development of a group 5 later stages in the development of a group part ii theoretical approaches to group counseling 6 the psychoanalytic approach to groups 7 adlerian group counseling 8 psychodrama 9 the existential approach to groups 10 the person centered approach to groups 11 gestalt therapy in groups 12 transactional analysis 13 the behavioral approach to groups 14 rational emotive behavior therapy in groups 15 reality therapy in groups part iii integration and application 16 comparisons contrasts and integration 17 the evolution of a group an integrative perspective

the broad perspective multidisciplinary approach of the second edition makes it invaluable in the counselling context at any level it is comprehensive enough for full time counsellors and students but it is also a resource for health care professionals for whom counselling is an intrinsic component of their practice

practicing counseling and psychotherapy insights from trainees supervisors and clients offers a framework for understanding the counseling and psychotherapy process that can be used in any training program clinical examples and discussion questions are included throughout the book and are based on a large scale empirical study that qualitatively and quantitatively examines the experiences of trainees clients and supervisors this volume is an excellent resource for those who want an insider s view and conceptualization from the perspectives of psychotherapy trainees their clients and their supervisors

the field of counseling and psychotherapy has for years presented the puzzling spectacle of unabating enthusiasm for forms of treatment whose effectiveness cannot be objectively demonstrated with few exceptions statistical studies have consistently failed to show that any form of psychotherapy is followed by significantly more improvement than would be caused by the mere passage of an equivalent period of time despite this practitioners of various psychotherapeutic schools have remained firmly convinced that their methods are effective many recipients of these forms of treatment also believe that they are being helped the series of investigations reported in this impressive book resolve this paradoxical state of affairs the investigators have overcome two major obstacles to progress in the past lack of agreement on measures of improvement and difficulty of measuring active ingredients of the psychotherapy relationship the inability of therapists of different theoretical persuasions to agree on criteria of improvement has made comparison of the results of different forms of treatment nearly impossible the authors have solved this intractable problem by using a wide range of improvement measures and showing that regardless of measures used in different studies a significantly higher proportion of results favor their hypothesis than disregard it overall this book represented a major advance at the time of its original publication and is of continuing importance the research findings resolve some of the most stubborn research problems in psychotherapy and the training program based on them points the way toward overcoming the shortage of psychotherapists charles b truax is in addition to this book author of counseling and psychotherapy process and outcome the process of group psychotherapy relationships between hypothesized therapeutic conditions and intrapersonal exploration toward a tentative measurement of the central therapeutic ingredients and talking won t help a study of the process and outcome of psychotherapy with hospitalized schizophrenics robert r carkhuff is president of human technology inc and chairman of carkhuff institute of human technology he is the author of the possibilities leader the possibilities mind and beyond counseling and therapy

theory and practice of counselling and psychotherapy south african edition provides an easy to understand text which helps students compare and contrast the therapeutic models expressed in counselling theories corey introduces you to the major theories psychoanalytic adlerian existential person centred gestalt reality behaviour cognitive behaviour family systems feminist and postmodern approaches and demonstrates how each can be applied to a single exemplar case that of a fictional character graham

this manual contains structured self awareness exercises that help you gain a deeper self understanding and grasp the concepts of the various approaches

incorporating the thinking feeling and behaving dimensions of human experience the tenth edition of corey s best selling

text helps you compare and contrast the therapeutic models expressed in counseling theories corey introduces you to the major theories psychoanalytic adlerian existential person centered gestalt reality behavior cognitive behavior family systems feminist postmodern and integrative approaches and demonstrates how each theory can be applied to two cases stan and gwen he shows you how to apply theories in practice and helps you learn to integrate the theories into an individualized counseling style new learning objectives identify key aspects of each theory and focus your study

this overview of counseling covers the foundations theories and practices of the profession the presentation is well balanced not emphasizing any particular theoretical orientation this edition includes current information regarding the role of the counselor in various cacrep approved settings and current issues such as aids gender issues gays and lesbians older adults and survivors of childhood sexual abuse

in this book we contend that the psychologist who engages in counseling can be both practitioner and scientist that he can contribute to knowledge while helping clients admittedly few counselors are theorists in the strict sense of the term but inevitably every counselor will bring to his work with clients certain assumptions he will have some underlying rationale vague and implicit though it may be for what he does some hunches about what different clients will do in different situations and some general ideas about the counseling procedures that are apt to be effective if he is to make claims for the efficacy of his practice he must be willing to subject these ideas to empirical test only then can he begin to find out whether what he has done works and how it works only as the counselor makes communicable what he does can his knowledge be imparted to others this book begins with our argument for reconciling the dual roles of practicing counselor and researcher and proceeds to a short guided tour of current empirical and theoretical approaches to counseling we do not insist upon the adoption of any particular approach to counseling but we do urge the practicing counselor to make explicit his own assumptions and to use them in making verifiable predictions about the observable behavior of clients and counselor
