the history of cable television in america is far older than networks like mtv espn and hbo which are so familiar to us today tracing the origins of cable tv back to the late 1940s media scholar john mcmurria also locates the roots of many current debates about premium television cultural elitism minority programming content restriction and corporate ownership republic on the wire takes us back to the pivotal years in which media regulators and members of the viewing public presciently weighed the potential benefits and risks of a two tiered television system split between free broadcasts and pay cable service digging into rare archives mcmurria reconstructs the arguments of policymakers whose often sincere advocacy for the public benefits of cable television were fueled by cultural elitism and the priority to maintain order during a period of urban black rebellions he also tells the story of the people of color rural residents women s groups veterans seniors and low income viewers who challenged this reasoning and demanded an equal say over the future of television by excavating this early cable history and placing equality at the center of our understanding of media democracy republic on the wire is a real eye opener as it develops a new methodology for studying media policy in the past and present

the early anglo saxon period is characterized archaeologically by the regular deposition of

artefacts in human graves in england the scope for dating these objects and graves has long been studied but it has typically proved easier to identify and enumerate the chronological problems of the material than to solve them prior to the work of the project reported on here therefore there was no comprehensive chronological framework for early anglo saxon archaeology and the level of detail and precision in dates that could be suggested was low the evidence has now been studied afresh using a co ordinated suite of dating techniques both traditional and new a review and revision of artefact typology seriation of grave assemblages using correspondence analysis high precision radiocarbon dating of selected bone samples and bayesian modelling using the results of all of these these were focussed primarily on the later part of the early anglo saxon period starting in the 6th century this research has produced a new chronological framework consisting of sequences of phases that are separate for male and female burials but nevertheless mutually consistent and coordinated these will allow archaeologists to assign grave assemblages and a wide range of individual artefact types to defined phases that are associated with calendrical date ranges whose limits are expressed to a specific degree of probability important unresolved issues include a precise adjustment for dietary effects on radiocarbon dates from human skeletal material nonetheless the results of this project suggest the cessation of regular burial with grave goods in anglo saxon england two decades or even more before the end of the seventh century that creates a limited but important discrepancy with the current numismatic chronology of early english sceattas the wider implications of the results for key topics in anglo saxon archaeology and social economic and religious history are discussed to conclude the report
