the four articles in this issue represent recent developments in the study of basic processes in l2 reading at the primary level the research reported reflects the array of theoretical and instructional issues targeted currently by researchers who wish to understand l2 reading development in young children ultimately this research should be used to help policymakers and educators make better informed decisions about how l2 literacy instruction can be enhanced across various sociocultural and linguistic boundaries

research into natural language processing the use of computers to process language has developed over the last couple of decades into one of the most vigorous and interesting areas of current work on language and communication this book introduces the subject through the discussion and development of various computer programs which illustrate some of the basic concepts and techniques in the field the programming language used is prolog which is especially well suited for natural language processing and those with little or no background in computing following the general introduction the first section of the book presents prolog and the following chapters illustrate how various natural language processing programs may be written using this programming language since it is assumed that the reader has no previous experience in programming great care is taken to provide a simple yet comprehensive introduction to prolog due to the user friendly nature of prolog simple yet effective programs may be written from an early stage the reader is gradually introduced to various techniques for syntactic processing ranging from finite state network recognisors to chart parsers an integral element of the book is the comprehensive set of exercises included in each chapter as a means of cementing the reader s understanding of each topic suggested answers are also provided an introduction to natural language processing through prolog is an excellent introduction to the subject for students of linguistics and computer science and will be especially useful for those with no background in the subject

multilingual aspects of speech sound disorders in children translates research into clinical practice for speech language pathologists working with children the book explores both multilingual and multicultural aspects of children with speech sound disorders the 30 theoretical and clinical chapters have been written by 44 authors from 16 different countries about 112 languages and dialects

one of the most complex topics in the study of the indigenous languages of the americas and indeed in the study of any language set is the complex behaviour of multi verb constructions in many languages several verbs can co occur in a sentence forming a single predicate this book contains a first survey of such constructions in languages of north middle and south america though it is not a systematic typological survey the combined insights from the various chapters give a very rich perspective on this phenomenon involving a host of typologically diverse constructions including serial verb constructions auxiliaries co verbs phasal verbs incorporated verbs etc aikhenvald s long introduction puts the chapters into a single perspective

the alboran sea represents a regional mediterranean space where north and south worlds merges creating a geopolitical region where marine resources and maritime activities should be managed from a national and international perspectives it is widely known that currently the planet is suffering a global change and it is also affecting the alboran sea its ecosystems and populations an important first step to update a paramount vision on this region is to understand the climatic geologic and oceanographic including biochemical cycles process which shapes the rich geodiversity biodiversity the productivity and the sustainable use of the marine resources from alboran sea the fisheries management system should take into account marine environmental variability to achieve biological sustainability of marine resources well funded policy makers decisions require a sound science based knowledge of the interaction between the marine environment and commercial stocks this is because the role of marine environment in the evolution of fish stocks is sometimes even more important than the one played by fishers in the commercial exploitation of them finally we should analyze the different aspects of political context that could affect the management of the resources from alboran sea in the context of climate change this book reviews different aspects of the alboran sea to help understand the current situation from the original tethis ocean the book is divided into four blocks i oceanographic geological and ecological context chapters 2 to 7 ii biodiversity and ecosystems distribution chapters 8 to 12 iii fisheries resources and aquaculture chapters 13 to 20 and iv conservation management and marine polices chapters 21 to 25

this volume the fifth in the handbook of middle american indians presents a summary of work accomplished since the spanish conquest in the contemporary description and historical reconstruction of the indigenous languages and language families of mexico and central america the essays include the following inventory of descriptive materials by william bright inventory of classificatory materials by maria teresa fernández de miranda lexicostatistic classification by morris swadesh systemic comparison and reconstruction by robert longacre and environmental correlational studies by sarah c gudschinsky sketches of classical nahuatl by stanley newman classical yucatec maya by norman a mcquown and classical quiché by munro s edmonson provide working tools for tackling the voluminous early postconquest texts in these languages of late preconquest empires aztec maya quiché further sketches of sierra popoluca by benjamin f elson of isthmus zapotec by velma b pickett of huautla de jiménez mazatec by eunice v pike of jiliapan pame by leonardo manrique c and of huamelultec chontal by viola waterhouse together with those of nahuatl maya and quiché provide not only descriptive outlines of as many different linguistic structures but also linguistic representatives of seven structurally different families of middle american languages miguel léon portilla presents an outline of the relations between language and the culture of which it is a part and provides examples of some of these relations as revealed by contemporary research in indigenous middle america the volume editor norman a mcquown 1914 2005 was professor of anthropology at the university of chicago he formerly taught at hunter college and served with the mexican

department of indian affairs he carried out fieldwork with totonac huastec tzeltal tzotzil mame and other tribes the handbook of middle american indians was assembled and edited at the middle american research institute of tulane university with the assistance of grants from the national science foundation and under the sponsorship of the national research council committee on latin american anthropology
