discusses the basics of strategic management as well as financial management and explains how businesses can formulate strategies to pursue their financial objectives and strengthen their financial position it is intended as a text for postgraduate students of management in addition students pursuing professional courses such as chartered accountancy mfc as well as professionals in the corporate sector will find the book useful

this textbook presents a comprehensive treatment of the legal arrangement of the corporation the instruments and institutions through which capital can be raised the management of the flow of funds through the individual firm and the methods of dividing the risks and returns among the various contributors of funds now in its third edition the book covers a wide range of topics in corporate finance from time series modeling and regression analysis to multi factor risk models and the capital asset pricing model guerard gultekin and saxena build significantly on the first edition of the text but retain the core chapters on cornerstone topics such as mergers and acquisitions regulatory environments bankruptcy and various other foundational concepts of corporate finance new to the third edition are examinations of apt portfolio selection and time series modeling and forecasting through sas sca and oxmetrics programming factset fundamental data templates this is intended to be a graduate level textbook and could be used as a primary text in upper level mba and financial engineering courses as well as a supplementary text for graduate courses in financial data analysis and financial investments

the second edition of the book encompasses two new chapters strategic cost management and business ethics a strategic financial management instrument the book being an augmented version of the previous edition equips the young managers with the fundamentals and basics of strategic management and financial management in a cogent manner the text now provides a better orientation to the students on the topics

like corporate restructuring divestitures acquisitions and mergers in the global context with the help of examples and caselets the book has been revised keeping in view the requirements of postgraduate students of management and the students pursuing professional courses such as ca mfc and cs in addition professionals working in the corporate sector may also find the book beneficial to integrate the financial management functions into business strategy and financial operations distinctive features model question papers have been appended at the end of the book better justification of topics by merging the contents wherever required theory supported with caselets inspired from global as well as indian context

this paperback text emphasizes the financial concepts and tools essential for understanding the financial impacts of business decisions the author uses current examples of actual business situations to demonstrate how financial tools concepts and theories can be used by managers to improve decision making and enhance business performance the text has a global emphasis with an equal number of domestic and international examples the author includes a discussion of international financial statements and the financial impacts of changes in foreign exchange rates the book s major appeal is its direct concise and no nonsense approach to understanding both the basics of finance and current financial concepts which allows even non financial managers to understand financial analysis

inhaltsangabe introduction over the last two decades real options analysis roa has become a fundamental part of project evaluation its increasing use in academia and corporations as well as its application to a wide range of industries make it a valuable tool in finance and accounting departments around the world classical capital budgeting approaches like net present value npv techniques do not account for additional flexibility and are therefore a very static measurement in addition to this a further core factor is the strategic aspect of the investment decision companies often make decisions according to strategic reasons this raises the question of how the bargaining power is divided between a seller and a buyer furthermore the influence of the hold up problem on the two involved players is analyzed finally the trade surplus of the investment is divided between the seller on the one hand and the buyer on the other hand using a game theoretic approach to model this relationship the airline industry is examined in this paper as it offers many possibilities to apply and explain the concepts of real options and bargaining in bilateral negotiations this paper sets out to analyze the value of flexibility of an investment decision and discusses in a second step how the strategic power between the two parties involved is allocated in academic literature limited research has been done to find out about the combination of a real options analysis and the distribution of the trade surplus between the different players involved this presents the following questions does an option in terms of the purchase of an aircraft have additional value in comparison to a classical and inflexible buy now decision for an airline if this is the case how much is this value worth and how is the trade surplus distributed between the two parties involved are there any hold up problems the following chapters will examine and answer these issues chapter two deals with a literature review on standard real options analysis in general and the airline sector in particular in chapter three background information about the airline industry is given and it is stressed why this sector is used for the capital budgeting approach chapter four covers the methodology that is used in chapter five in this chapter a case study involving the purchase decision of an aircraft is discussed using different methods to analyze the commit now and purchase

the decision to invest in oil field development is an extremely complex problem even in the absence of uncertainty due to the great number of technological alternatives that may be used to the dynamic complexity of oil reservoirs which involves mul phase flows oil gas and water in porous media with phase change and to the c plicated combinatorial optimization problem of choosing the optimal oil well network that is choosing the number and types of wells horizontal vertical directional m tilateral required for draining oil from a field with a view to maximizing its economic value this problem becomes even more difficult when technical uncertainty and e nomic uncertainty are considered the former are uncertainties regarding the existence volume and quality of a reservoir and may encourage an investment in information

before the field is developed in order to reduce these uncertainties and thus optimize the heavy investments required for developing the reservoir the economic or market uncertainties are associated with the general movements of the economy such as oil prices gas demand exchange rates etc and may lead decision makers to defer vestments and wait for better market conditions choosing the optimal investment moment under uncertainty is a complex problem which traditionally involves dynamic programming tools and other techniques that are used by the real options theory

selected chapters from principles of corporate finance richard a brealey stewart c myers and integrated risk management neil a doherty

this brief handy guide reviews financial management s most frequently used formulas basic concepts and definitions the easy to use reference revisits the essentials of a basic financial management course without the bulk and expanded explanations of a principals text as an inexpensive no frills review it is an excellent supplement for many undergraduate finance case and any upper division courses

this textbook provides readers with an interesting overview of the field of corporate valuation in a quick and easy way for the second edition the authors have added a new 9th chapter devoted to valuations and the use of argumentation values in negotiation situations the book includes a number of self test questions with answers the contents introduction discounted cash flow valuation dcf valuation comparable companies analysis precedent transactions analysis further valuation methods from enterprise value to equity value the tension between principals evaluators objectives and leeway in corporate valuations value and price a tangent on valuation theory argumentation values in negotiation self test questions proposal for solutions
