according to experts a substantial portion of our communication is nonverbal every day we respond to thousands of nonverbal cues and behaviors including postures facial expression eye gaze gestures and tone of voice from our handshakes to our hairstyles nonverbal details reveal who we are and impact how we relate to other people scientific research on nonverbal communication and behavior began with the 1872 publication of charles darwin s the expression of the

emotions in man and animals since that time there has been an abundance of research on the types effects and expressions of unspoken communication and behavior while these signals are often so subtle that we are not consciously aware of them research has identified several different types of nonverbal communication

my interest in nonverbal behavior has remained constant for over 15 years i think this has been the case because nonverbal behavior has proved a very fascinating and challenging topic others might suggest that i am just a slow learner with enough time in any area however one begins to feel that he or she has some special insights to offer to others about the time that i was struck with that thought approximately two and a half years ago i was developing the first version of my sequential functional model of nonverbal exchange it seemed to me that the functional model might provide a very useful framework for a book discussing and analyzing nonverbal behavior i did not want nor do i think i had the patience to write a comprehensive review of research on nonverbal behavior other works such as siegman and feldstein s 1978 edited nonverbal behavior and communication and harper wiens and matarazzo s 1978 nonverbal communication the state of the art have provided excellent reviews of the research on nonverbal behavior instead what i have tried to do in this book is to use nonverbal behavior as a vehicle for discussing social behavior in a very real sense this analysis of nonverbal behavior is a means to an end not an end in itself a consequence of this approach is that this review is a selective one unlike the comprehensive works mentioned earlier

even though our society subtly discourages the verbal expression of emotions most of us in ostensibly conforming to our roles nevertheless manage to express likes dislikes status differences personalities as well as weaknesses in nonverbal ways using vocal expressions gestures postures and movements we amplify restrict or deny what our words say to one another and even say some things with greater facility and efficiency than with words in this new multidimensional approach to the subject of nonverbal communication albert mehrabian brings together a great deal of original work which includes descriptions of new experimental methods that are especially suited to this field detailed findings of studies scattered throughout the literature and most importantly the integration of these findings within a compact framework the framework starts with the analysis of the meanings of various nonverbal behaviors and is based on the fact that more than half of the variance in the significance of nonverbal signals can be described in terms of the three orthogonal dimensions of positiveness potency or status and responsiveness these three dimensions not only constitute the semantic space for nonverbal communication but also help to identify groups of behaviors relating to each to describe characteristic differences in nonverbal communication to analyze and generate rules for the understanding of inconsistent messages and to provide researchers with new and comprehensive measures for description of social behavior this volume will be particularly valuable for both the professional psychologist and the graduate student in psychology it will also be of great interest to professionals in the fields of speech and communication sociology anthropology and psychiatry

nonverbal behavior applications and cultural implications covers the role of nonverbal behavior in interpersonal and intercultural communications the book

discusses the emergence of an alternate epistemology in science and its application to the study of communication the research on the measurement of the sensitivity to nonverbal communication and the applications of nonverbal behavior in teaching the text also describes some cultural sources of miscommunication in interracial interviews the teacher and nonverbal behavior in the multicultural classroom and the social contexts for ethnic borders and school failure the implication of common misconceptions about nonverbal communication for training is also considered educators practitioners researchers and students of human communication will find the book invaluable

this volume offers a comprehensive overview of the field of nonverbal behaviour from a multidisciplinary and international perspective it examines current applications of nonverbal behaviour in teaching counselling and therapy in addition to looking at the intercultural implications included is an extensive bibliography of books published on this subject over the last 100 years the book is intended for students teachers practitioners and researchers of social and clinical psychology anthropology speech communications education and linguistics and can be used as a textbook for both undergraduate and graduate students of human communication provided by publisher

first published in 1985 this book takes a multichannel perspective the first three chapters are written from a distinctly functional perspective the function of nonverbal behavior on interpersonal attraction in the expression of emotions and in the control of conversations they are followed by two topically organized chapters namely the role of nonverbal behavior in interpersonal expectancies and deceptive communications they in turn are followed by a process oriented discussion of the nature of nonverbal behavior the book concludes with two contributions concerned with the demography of nonverbal behavior the role of gender class and ethnicity with the latter viewed from a cultural perspective in each case however the chapter is organized to the extent possible from a multichannel perspective
