education is a paradoxical phenomenon on the one hand it is universal as since the period of enlightenment it has been declared universal good for everybody moreover we learnt by historical research following the ideas of world system theory that since this time as far as its main structures are concerned compulsory state education given by professional teachers in classrooms it took even universal traits however on the other hand the fact that education became state education organised or at least controlled by the state was the beginning of another tradition line education in the form of state organised educational institutions became a means of creating national identity universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist exclusion of all the others shaping the feature of a particular nation state with a particular educational system this fundamental dialectical tension between the universal and the particular was one of the important motives to make this handbook one of the central issues of the country studies is precisely to display the relationship between universal values and the search for national identity another motive is given by the european dimension of the handbook

in this issue guest editors bring their considerable expertise to this important topic provides in depth reviews on the latest updates in the field providing actionable insights for
