the first purpose of this book is to provide a comprehensive review of  
the state of development of natural analogue studies with emphasis on  
those studies which are relevant to the following repository designs  
nagra switzerland disposal concepts for high level waste low and  
intermediate level waste skb sweden disposal concepts for spent fuel low  
and intermediate level waste and nirex uk disposal concept for low and  
intermediate level waste the book s second aim is to discuss the  
expanding application of natural analogues for non performance  
assessment purposes especially their potential for presenting the  
concept of geological disposal to various interested audiences in a  
coherent understandable and scientifically legitimate manner much of the  
discussion of the book is relevant to concepts for geological disposal  
of radioactive wastes by other countries and is concerned only with  
those physico chemical processes which control the release of  
radionuclides from the near field and their subsequent retardation and  
transport in the geosphere
