an entertaining accessible biography of one of the greatest innovators ever known

ten short biographies of christian lives that still impact our culture and lives today

despite a debilitating life long illness galileo changed physics from a purely philosophical subject into one involving mathematics and careful observation but his innovations didn t stop there he also challenged beliefs about the very structure of the universe arguing that the earth moves around the sun at

dizzying speeds and using the telescope galileo showed philosophers that the sun moon and stars aren't made of an ethereal and unchangeable fifth element but are composed of the same stuff that ordinary terrestrial objects are but suggesting such dramatic changes made philosophers uncomfortable and because philosophers were unable to refute galileo on their own playing field they sought help from theologians sending galileo head long into a conflict with church officials galileo appealed to church fathers like st augustine to prevent the theologians from making what he saw as a tragic mistake but intrigues personality clashes and misunderstandings led to galileo's famous trial and condemnation events misinterpreted as showing a fundamental conflict between science and religion

in an effort to bridge the gap between the often different worlds of professors and students this exploration of renaissance and reformation europe offers an accessible engaging approach that pays sufficient attention to the roles and contributions of women its conversational tone and concise presentation are examples of an approach that is more representative than comprehensive introducing historical figures and concepts as they flow through the narrative without frequent interruption to include and define technical and foreign terms rather than a compendium or grand summa the text serves as a brief introduction to some of the major personalities issues events and ideas of the renaissance and reformation age

this collection is designed to answer the demands of students and socialists teachers and interested readers for a comprehensive critique of the major schools of european marxism since the october revolution it is composed of a series of carefully documented essays setting out the theories of the major thinkers of the tradition and submitting them to searching criticism essays include critiques of lukács by gareth stedman jones and michael llywy a survey of the frankfurt school by goran therborn an assessment of the legacy of gramsci by john merrington exposition and criticism of the work of sartre by andré gorz and ronald aronson major assessments of althusser by norman geras and andré glucksmann and a wide ranging interview with the italian philosopher lucio colletti that provides an overview of western marxism

illustrated with photos diagrams and digital imagery this chronicle searches for the meaning of numbers and explores puzzling aspects of the mathematical world and the people who made it

galileo's trial in 1633 before the roman inquisition is one of the most frequently mentioned topics in the history of science galileo's encounter with the

catholic church was not only a major turning point in the history of western culture it is the paradigm case of the clash between the institutional authority of religion and the authority of scientific reason a clash that has come to define the modern era blackwell s new contribution to the galileo affair concerns the official theological position against galileo the centerpiece of his project is the treatise entitled tractatus syllepticus written by melchior inchofer s j whose judgment of the orthodoxy of galileo s dialogue had been requested earlier by the holy office and was then incorporated into the proceedings of the trial at the time inchofer s judgment against galileo s book was both detailed and harsh that judgment formed the basis for inchofer s subsequent tractatus the first english translation of which is included in this volume inchofer s text provides a new and fascinating way of looking at the defense of the guilty verdict galileo and his trial both legal and theological behind the scenes aspects of galileo s trial are discussed because of a weak legal case a plea bargain was arranged extrajudicially then sabotaged in the holy office before the final decision of the case through his close scrutiny of the specifics of the trial blackwell renders a picture that is more complex and ominous than the usual portrayal of the trial

mechanics the science of moving bodies and their interactions is among the finest accomplishments of western civilization this is the story of development from the ground breaking attempts of the greeks through the brilliant abstractions of medieval logicians to the breathtaking achievements of galileo huygens and newton to the dazzling virtuosity of maxwell and einstein crowe s presentation allows the reader to appreciate this story from the inside following the thoughts of the original authors in their own words ample commentary places these scientific giants in their context and helps modern readers understand the unfamiliar modes of expression of earlier times in the course of telling the story this book also provides a practical introduction to mechanics with sample computations and problems in both classical physics and relativistic kinematics

placing the development of catholicism in the context of both social and political changes as well as the protestant reformation this comprehensive study incorporates new research and reflects the changing perspectives of the late 20th century
