this book constitutes the refereed proceedings of the 17th international conference on software architecture ecsa 2023 held in istanbul turkey in september 2023 the 16 full papers and the 9 short papers included in this volume were carefully reviewed and selected from 71 submissions they address the most recent innovative and significant findings and experiences in the field of software architecture research and practice

cloud computing has become integrated into all sectors from business to quotidian life since it has revolutionized modern computing there is a need for updated research related to the architecture and frameworks necessary to maintain its efficiency the handbook of research on end to end cloud computing architecture design provides architectural design and implementation studies on cloud computing from an end to end approach including the latest industrial works and extensive research studies of cloud computing this handbook enumerates deep dive and systemic studies of cloud computing from architecture to implementation this book is a comprehensive publication ideal for programmers it professionals students researchers and engineers

the book summarizes key concepts and theories in trusted computing e g tpm tcm mobile modules chain of trust trusted software stack etc and discusses the configuration of trusted platforms and network connections it also emphasizes the application of such technologies in practice extending readers from computer science and

information science researchers to industrial engineers

this book constitutes the proceedings of the second international workshop on emerging technologies for authorization and authentication etaa 2019 held in luxembourg in september 2019 the 10 full papers presented in this volume were carefully reviewed and selected from numerous submissions they focus on new techniques for biometric and behavioral based authentication authentication and authorization in the iot and in distributed systems in general techniques for strengthen password based authentication and for dissuading malicious users from stolen password reuse an approach for discovering authentication vulnerabilities in interconnected accounts and strategies to optimize the access control decision process in the big data scenario

the book advances in information and communication networks proceedings of the 2022 future of information and communication conference ficc aims in presenting the latest research advances sharing expert knowledge and exchanging ideas with the common goal of shaping the future of information and communication the conference attracted 402 submissions of which 131 submissions including six poster papers have been selected through a double blind review process by an international panel of expert referees this book discusses on aspects of communication data science ambient intelligence networking computing security and internet of things from classical to intelligent scope the intention is to help academic pioneering researchers scientists industrial engineers and students become familiar with and stay abreast of the ever changing technology surrounding their industry we hope that readers find the volume interesting and valuable it gathers chapters addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research

this book provides a broad overview of the many card systems and solutions that are in practical use today this new edition adds content on rfids embedded security attacks and countermeasures security evaluation javacards banking or payment cards identity cards and passports mobile systems security and security management a step

by step approach educates the reader in card types production operating systems commercial applications new technologies security design attacks application development deployment and lifecycle management by the end of the book the reader should be able to play an educated role in a smart card related project even to programming a card application this book is designed as a textbook for graduate level students in computer science it is also as an invaluable post graduate level reference for professionals and researchers this volume offers insight into benefits and pitfalls of diverse industry government financial and logistics aspects while providing a sufficient level of technical detail to support technologists information security specialists engineers and researchers

mobisec 2009 was the first icst conference on security and privacy in mobile information and communication systems with the the vast area of mobile technology research and application the intention behind the creation of mobisec was to make a small but unique contribution to build a bridge between top level research and large scale application of novel kinds of information security for mobile devices and communication the papers at mobisec 2009 dealt with a broad variety of subjects ranging from issues of trust in and security of mobile devices and embedded hardware security over efficient cryptography for resource restricted platforms to advanced applications such as wireless sensor networks user authentication and privacy in an environment of autonomously communicating objects with hindsight a leitmotif emerged from these contributions which corrobarated the idea behind mobisec a set of powerful tools have been created in various branches of the security discipline which await combined application to build trust and security into mobile that is all future networks autonomous and personal devices and pervasive applications
