this collection of photographs of the water towers of new york city are not only a tribute to these iconic structures of the city s landscape but also a pretext to explore hidden details of its architecture rooftop water towers are an unique opportunity to experiment with shapes forms and textures a frequent component of my photographic quest inspired by famous paintings like edward hopper s rooftop 1926 and by the ever changing architectural scene i focused my attention on the cylindrical wooded structures and framed them with the surrounding buildings this a is a collection of many years of

walking the streets of new york with my camera water is our most precious natural resource new york city s skyline is dotted with wooden water towers the result of a 19th century s law requiring all buildings taller than six stories to be equipped with a rooftop water tank this was necessary to prevent the need for excessively high pressures at lower elevations which could burst pipes pressure in the city s pipes can take water up only about half a dozen stories so a higher building needs either a pumping system or a system of tanks a water tower seemed like the better solution since it also provides emergency storage for fire protection a water tower store 25 000 to 50 000 liters of water until it is needed in the building below the upper portion of water is skimmed off the top for everyday use while the water in the bottom of the tower is held in reserve to fight fire when the water drops below a certain level a pressure switch level switch or float valve activate a pump or open a public water line to refill the water tower even today no sealant is used to hold the water in the wooden walls are held together with cables but leak through the gaps when first filled as the water saturates the wood swells the gaps close and the tank become impermeable

as water supply technology developed the late 20th century saw many water towers being demolished and few being built this book documents the development of an essential component of the infrastructure of bringing clean water to people s homes commerce and industry without which society could not function back cover

after thirty years of public punishment the new world order has subjugated many of its citizens to abandoned water towers to die from exposure and thirst it is a slow and agonizing death watched on live video feeds the termination of the sitters is witnessed and wagered for entertainment and profit but not all water towers are scrutinized the water tower in the town of vickeroy is mostly ignored the sitters are placed on the dull silver dome and left to die with little notice their bones cleaned and redistributed to family or the watchers waiting below the dead have value but something strange is happening on the vickeroy death tower some of the sitters are changing evolving some would say they have become angels and others demons yet others would say that evolution has pivoted the monsters are loose

this is an imaginary tale of a water tower and its caretaker

walter walter maintains a daily routine taking care of this town s water tower

nobody in preston could remember when the watertower was built or who had built it but there it stood on shooter s hill its iron legs rusted its egg shaped tank warped and leaking casting a long dark shadow across the valley across preston itself
