a new American national standard for radiation worker training was recently developed. The standard emphasizes performance based training and establishing a training program rather than simply prescribing objectives. The standard also addresses basic criteria including instructor qualifications. The standard is based on input from a wide array of regulatory agencies, universities, national laboratories and nuclear power entities. This paper presents an overview of the new standard and the philosophy behind it. The target audience includes radiation workers, management and supervisory personnel, contractors, students, emergency personnel and visitors.
