it is a great book for a first year us graduate student one of the nice features of the book is that the book contains full solutions for all of the problems which make it useful as reference for self study or qualifying exam prep see full review maa reviewsin this third volume of a course in analysis two topics indispensable for every mathematician are treated measure and integration theory and complex function theory in the first part measurable spaces and measure

spaces are introduced and Carathéodory's extension theorem is proved this is followed by the construction of the integral with respect to a measure in particular with respect to the Lebesgue measure in the Euclidean space the Radon-Nikodym theorem and the transformation theorem are discussed and much care is taken to handle convergence theorems with applications as well as  $L^p$  spaces integration on product spaces and Fubini's theorem is a further topic as is the discussion of the relation between the Lebesgue integral and the Riemann integral in addition to these standard topics we deal with the Hausdorff measure convolutions of functions and measures including the Friedrichs mollifier absolutely continuous functions and functions of bounded variation the fundamental theorem of calculus is revisited and we also look at Sard's theorem or the Riesz-Kolmogorov theorem on pre-compact sets in  $L^p$  spaces the text can serve as a companion to lectures but it can also be used for self-studying this volume includes more than 275 problems solved completely in detail which should help the student further

First of all the author wants to make it crystal clear that the present work is of a great benefit both for the English and Arab learners of the target language either Arabic or English this edition of the book pinpoints previous researchers' findings regarding English and Arabic phonological morphological and syntactic similarities and differences and how all these differences result in mistakes and errors by the Arab learners of English in their learning process these mistakes or errors are unconsciously or involuntarily made by Arab learners of English due to the differences between the system and sub-systems of the two languages the present attempt is the result of my realization as an English language teacher as to how a teacher can minimize students' difficulties in learning of English and maximize their knowledge skills and competency of English as a foreign or second language this is the first edition the work is pedagogically oriented and primarily intended to make teaching learning of English as a foreign second language a bit easy especially for the first year university students of English language in the Arab world Gulf area such as KSA UAE Kuwait and the Middle East area such as Jordan Syria Lebanon and so on the focus is on phonetic and morpho-syntactic variations in Arabic and English languages this area of research becomes more interesting through the assumptions i information about the differences and similarities between Arabic and English language is to be supplied at an early stage since this facilitates the students' learning task ii the differences are to be presented in pedagogically suitable format iii it is useful to separate and present phonetics morphological and syntactic categories as they function in suitable contexts and not merely abstract notions iv before students may tackle contrastive analysis they should have basic knowledge of Arabic and English languages similarities and differences and v pre-modification and post-modification of lexical and syntactic structures are to be explained appropriately
