unless considered on a practical level where a precise distribution of social goods is chosen John Rawls's and Gerald Cohen's approaches to social justice cannot be complementary their disagreement about justice and its principles calls for a choice which opts either for the Rawlsian theory or for the Cohenian one what is the more plausible approach to social justice this work compares both approaches and aims to defend Cohen's position in the light of two considerations it answers the philosophical question about the analysis of the idea of justice which puts the virtue of justice in its philosophical context it however presents a method everyone can apply in order to arrive at the fundamental principles of justice by employing the power of reason an analysis of the concept of justice based on the power of reason should seek to uncover the ultimate nature of justice which is independent of facts and of other virtues once exposed the understanding of justice arrived at should inform social institutions and determine people's daily decisions a just society is therefore a society where just persons and just institutions exhibit the virtue of justice

Plato's introduction to the question of justice uncovers the heart of the Platonic analysis of justice by focusing on the crucial opening sections of the Republic Stauffer argues that the dialectical confrontations with ordinary opinion presented in these sections provide the basis for Plato's view of justice and that they also help to show how Plato's thought remains relevant today especially as a rival to Kantianism

This book deals with the fascinating debate over the concept of justice proposed by two contemporary thinkers namely John Rawls and Amartya Sen justice means what is just but how do we know what is just what would be the viable criterion to legitimize justice is justice objective or subjective is justice a matter of ontological issue or an issue of realization what would be the paradigm of justice these are some important issues discussed in the book please note Taylor Francis does not sell or distribute the hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

In the urgency to respond to the challenges posed by diversity in contemporary societies the discussion of normative foundations is often overlooked this book takes

that important first step and offers new ways of thinking about diversity its contribution to an ongoing dialogue in this field lies in the construction of a normative framework which endeavours to better understand the challenges of justice in diverse societies by applying this normative framework to specific and broader examples of injustices in the spheres of religion culture race ethnicity gender and nationality the book demonstrates how constitutional pluralist discourses can contribute both to new and legal responses to diversity the book will be of interest to legal professionals policy makers law students and scholars concerned with exploring diversity in the 21st century

what do we really know about the impending caribbean court of justice the vexed issue of the court s establishment has been the subject of much debate but how much of this debate is informed by the facts this book bridges the information gap and provides an authoritative guide to the composition function and administration of this new court in a comprehensive yet clear and concise style the reader is given a background to the more contentious issues such as the funding of the court its constitutionality its original and appellate jurisdiction and the process of delinking from the privy council the exposition and analysis is complemented by an appendix which includes the agreements establishing the caribbean court of justice and the ccj trust fund as well as the accords concerning the regional judicial and legal services commission

this book comprises a series of studies devoted to an analytic examination of reasoning in the field of conduct the first is analysis of the idea of justice undertaken in a spirit of positivism the series continues in a different vein necessitated by compelling obligation the author found himself under to work out a logic of value judgments this logic is in fact the rhetoric and topics of antiquity the author s *traité de l argumentation* paris 1958 gave this new life and the present work demonstrates its philosophical importance
