this book will transform the way you think about design by showing how integral it is to our daily lives from the spoon we use to eat our breakfast cereal to the medical equipment used to save lives john heskett goes beyond style and taste to look at how different cultures and individuals personalise objects

there are many stories we can tell about the past and we are not perhaps as free as we might imagine in our choice of which stories to tell or where those stories end john arnold s very short introduction is a stimulating essay about how we study and understand history the book begins by inviting us to think about various questions provoked by our investigation of history and explores the ways these questions have been answered in the past concepts such as causation interpretation and periodization are introduced by means of concrete examples of how historians work giving the reader a sense of the excitement of discovering not only the past but also ourselves about the series the very short introductions series from oxford university

what is knowledge how does it differ from mere belief do you need to be able to justify a claim in order to count as knowing it how can we know that the outer world is real and not a dream questions like these are ancient ones and the branch of philosophy dedicated to answering them epistemology has been active for thousands of years in this thought provoking very short introduction jennifer nagel considers these classic questions alongside new puzzles arising from recent discoveries about humanity language and the mind nagel explains the formation of major historical theories of knowledge and shows how contemporary philosophers have developed new ways of understanding knowledge using ideas from logic linguistics and psychology covering topics ranging from relativism and the problem of scepticism to the trustworthiness of internet sources nagel examines how progress has been made in understanding knowledge using everyday examples to explain the key issues and debates about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

from the schools of ancient times to the present day gary thomas explores how and why education has evolved has it has examining education worldwide he explains the way schools work noting how curricula are remarkably consistent around the world delving into some of the big questions thomas explores the history of education in this very short introduction considering various styles such as progressive versus formal he also explores the ideas of some of the big theorists including piaget and vygotsky looking at different forms of education and styles of teaching he considers the ways in which education is being improved by matching styles of learning to teaching and ensuring that schools are more inclusive and meaningful for a broader range of students he finishes by considering the ways in which education may develop over the coming century about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

without writing there would be no records no history no books and no emails writing is an integral and essential part of our lives but when did it start why do we all write

differently and how did writing develop into what we use today all of these questions are answered in this very short introduction starting with the origins of writing five thousand years ago with cuneiform and egyptian hieroglyphs andrew robinson explains how these early forms of writing developed into hundreds of scripts including the roman alphabet and the chinese characters he reveals how the modern writing symbols and abbreviations we take for granted today including airport signage and text messaging resemble ancient ones much more closely than we might think about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

george bernard shaw has been called the second greatest playwright in english after william shakespeare and one of the inventors of modern celebrity as the most famous public intellectual of his time beginning in the 1880s as a critic and as a playwright he transformed british drama bringing to it intellectual substance ethical imperatives and modernity itself setting the theatrical course for the subsequent century that his legacy endures seventy years after his death is testament to the prescience of his thinking and his prolific creativity this very short introduction looks at shaw s life starting with his upbringing in ireland and then takes a chronological approach through his works considering shaw s committed antagonism on behalf of a range of socio political issues his use of comedy as a mode for communicating serious ideas and his rhetorical style that pushes conventional boundaries christopher wixson provides an overview of the creative evolution of core themes throughout shaw s long career about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

this stimulating very short introduction to music invites us to really think about music and the values and qualities we ascribe to it the world teems with different kinds of music traditional folk classical jazz rock pop and each type of music tends to come with its own way of thinking drawing on a wealth of accessible examples ranging from beethoven to chinese zither music nicholas cook attempts to provide a framework for thinking about all music by examining the personal social and cultural values that music embodies the book reveals the shortcomings of traditional conceptions of music and sketches a more inclusive approach emphasizing the role of performers and listeners about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these

from the beginning of time humans have been driven by both a fear of the unknown

and a curiosity to know we have always yearned to know what lies ahead whether threat or safety scarcity or abundance throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology as scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past yet the truth is there is still no certainty to be had in this very short introduction jennifer gidley considers some of our most burning questions what is the future is the future a time yet to come or is it a utopian place does the future have a history is there only one future or are there many possible futures she asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

infinity is an intriguing topic with connections to religion philosophy metaphysics logic and physics as well as mathematics its history goes back to ancient times with especially important contributions from euclid aristotle eudoxus and archimedes the infinitely large infinite is intimately related to the infinitely small infinitesimal cosmologists consider sweeping questions about whether space and time are infinite philosophers and mathematicians ranging from zeno to russell have posed numerous paradoxes about infinity and infinitesimals many vital areas of mathematics rest upon some version of infinity the most obvious and the first context in which major new techniques depended on formulating infinite processes is calculus but there are many others for example fourier analysis and fractals in this very short introduction ian stewart discusses infinity in mathematics while also drawing in the various other aspects of infinity and explaining some of the major problems and insights arising from this concept he argues that working with infinity is not just an abstract intellectual exercise but that it is instead a concept with important practical everyday applications and considers how mathematicians use infinity and infinitesimals to answer questions or supply techniques that do not appear to involve the infinite about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

economics has the capacity to offer us deep insights into some of the most formidable problems of life and offer solutions to them too combining a global approach with examples from everyday life partha dasgupta describes the lives of two children who live very different lives in different parts of the world in the mid west usa and in ethiopia he compares the obstacles facing them and the processes that shape their lives their families and their futures he shows how economics uncovers these processes finds explanations for them and how it forms policies and solutions along the way dasgupta provides an intelligent and accessible introduction to key economic factors and concepts such as individual choices national policies efficiency equity development sustainability dynamic equilibrium property rights markets and public goods about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

sample sections from the very short introductions series are presented in this encapsulation of human knowledge

how many languages are there what differentiates one language from another are new languages still being discovered why are so many languages disappearing these are some of the questions considered in this very short introduction by examining the science of languages we find that the answers are not as simple as we might expect
