excerpt from moral theory an introduction to ethics this book is intended to serve as an introduction to ethics as opposed to a handbook or manual the difference between the two as i conceive it lies in the fact that the one is intended to start the student on the subject and then leave him to pursue his own investigations while the other aims at giving him some sort of assistance throughout their course the manual therefore would have to give some account of all the chief ethical theories and all the chief ethical problems whereas this is just what the introduction would avoid in attempting to write an introduction in this sense i have followed a method which is very common in teaching and lecturing but has not been much used in published work that is i have taken after a brief introduction to the subject two specimen authors or rather two specimen works representing different points of view and have examined and criticized them in some detail these works should really be read by the student in conjunction with or before my own book but to avoid overburdening him or her with too much reading at the outset of the subject i have confined myself with slight exceptions to the consideration of these two works and have said as little as possible about the general philosophical views of the authors or even about their other ethical writings as i hope that this book may be of use to students who can read no language but english i have quoted throughout from standard translations of the works in question in the case of aristotle s ethics i have used peters translation and for kant s fundamental principles i have used the translation by dr t k abbott about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this is an ideal introduction to moral philosophy for beginning students and general readers dealing with the philosophical theories which often lie behind everyday opinions and inviting the reader to examine those theories thoroughly using numerous examples and diagrams professor bond guides the reader through the key problems of theoretical ethics seeking to outline a substantial view of morality in universal practical reason he concludes in an attempt to show that a viable universal morality can only relate to the thriving flourishing or well being of individuals in a community

simon blackburn tackles the major moral questions surrounding birth death happiness desire and freedom and considers how we should think about the meaning of life this new edition highlights the importance of an understanding of approaches to ethics and its foundations and how this relates to our modern world of eroding trust

for the introductory course in ethics basic moral problems or advanced courses in moral theory morality and the meaning of life offers a jargon free approach without sacrificing the rigors of logic

excerpt from moral theory an introduction to ethics after having suggested some possible criticisms of the theories worked out in these two books i have then attempted to see whether it would not be possible to arrive at a satisfactory positive result by a modification and development of one of them this occupies the latter part of the book but all the conclusions in this part are only put forward very tentatively and provisionally they are intended to stimulate thought and to suggest problems rather than to give a definite solution of them i owe a debt of gratitude to many friends who have helped me directly or indirectly in the preparation of this work for direct help i am indebted to my colleague prof alexander mair of this university with whom i have been able to discuss many of the problems here treated to mr w d ross fellow of oriel college oxford who has been kind enough to give me his opinions on the chapters on aristotle which he read through in manuscript and above all to prof j h muirhead of the university of birmingham who has read through the whole of the book in manuscript and made many valuable comments and suggestions mr j e turner of this university has helped me greatly in the work of correcting the proofs and preparing an index of all those who have helped me indirectly i can say but little but i must record a special debt of gratitude to my old tutor prof j a smith of oxford who first set me on the road to such understanding as i possess of aristotle and through him of moral philosophy in general and to my pupils in four universities with whom i have discussed these and kindred subjects and from whom in teaching i have learned more than i can possibly have taught them about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
