how the jewish people went from farmers to merchants in 70 ce the jews were an agrarian and illiterate people living mostly in the land of israel and mesopotamia by 1492 the jewish people had become a small group of literate urbanites specializing in crafts trade moneylending and medicine in hundreds of places across the old world from seville to mangalore what caused this radical change the chosen few presents a new answer to this question by applying the lens of economic analysis to the key facts of fifteen formative centuries of jewish history maristella botticini and zvi eckstein offer a powerful new explanation of one of the most significant transformations in jewish history while also providing fresh insights into the growing debate about the social and economic impact of religion

resonant alterities bridges the gap between sound studies and literary criticism a queer ghost story by vernon lee an occultist novel of psychic adventure by algernon blackwood a dystopian science fiction tale by j g ballard and a post traumatic short novel by don delillo are its primary objects of analysis each is explored within the context of its contemporary cultural debates on sound meanwhile all four theory enriched readings focus on intersecting and desire laden processes of meaning making knowledge production and subject formation focal points are aurally audio visually structured phenomena expressive of both collective and individual anxieties

sephardic and ashkenazic judaism have long been studied separately yet scholars are becoming ever more aware of the need to merge them into a single field of jewish studies this volume opens new perspectives and bridges traditional gaps the authors are not simply contributing to their respective fields of sephardic or ashkenazic studies rather they all include both sephardic and ashkenazic perspectives as they reflect on different aspects of encounters and reconsider traditional narratives subjects range from medieval and early modern sephardic and ashkenazic constructions of identities influences and entanglements in the fields of religious art halakhah kabbalah messianism and charity to modern ashkenazic sephardism and sephardic admiration for ashkenazic culture for reasons of coherency the contributions all focus on european contexts between the fourteenth and the nineteenth centuries

the most complete current guide to the signal processing techniques essential to advanced radar systems fully updated and expanded fundamentals of radar signal processing second edition offers comprehensive coverage of the basic digital signal processing techniques and technologies on which virtually all modern radar systems rely including target and interference models matched filtering waveform design doppler processing threshold detection and measurement

accuracy the methods and interpretations of linear systems filtering sampling and fourier analysis are used throughout to provide a unified tutorial approach end of chapter problems reinforce the material covered developed over many years of academic and professional education this authoritative resource is ideal for graduate students as well as practicing engineers fundamentals of radar signal processing second edition covers introduction to radar systems signal models pulsed radar data acquisition radar waveforms doppler processing detection fundamentals measurements and tracking introduction to synthetic aperture imaging introduction to beamforming and space time adaptive processing

in a collage of customs mark podwal s imaginative and inventive interpretations of woodcuts from a 16th century sefer minhagim book of customs allow readers of this volume to see these historic images in a new light podwal brings humor and whimsy to religious objects and practices while at the same time delivering profound and nuanced commentary on jewish customs and history both through his art and through his insightful accompanying text the book appears in concert with an exhibition of podwal s renderings at the cincinnati skirball museum

the standard handbook of electronics engineering has defined its field for over thirty years spun off in the 1960 s from fink s standard handbook of electrical engineering the christiansen book has seen its markets grow rapidly as electronic engineering and microelectronics became the growth engine of digital computing the ee market has now undergone another seismic shift away from computing and into communications and media the handbook will retain much of its evergreen basic material but the key applications sections will now focus upon communications networked media and medicine the eventual destination of the majority of graduating ees these days

here s all the engineering information needed to integrate the fields of optics and electronics assembling a unique blend of expertise from industry academia and government photonic aspects of modern radar shows the applications of this technology both in the evolution of today s radar and in future systems
