combining the nuanced perspective of an insider with the critical distance of a historian alexander macaulay examines the citadel s reactions to major shifts in postwar life from the rise of the counterculture to the demise of the cold war the citadel is widely considered one of the most traditional institutions in america and a bastion of southern conservatism in marching in step macaulay argues that the citadel has actually experienced many changes since world war ii changes that often

tell us as much about the united states as about the american south macaulay explores how the citadel was often an undiluted showcase for national debates over who deserved full recognition as a citizen most famously first for black men and later for women as the boundaries regarding race gender and citizenship were drawn and redrawn macaulay says attitudes at the citadel reflected rather than stood apart from those of mainstream america in this study of an iconic american institution macaulay also raises questions over issues of southern distinctiveness and sheds light on the south s real and imagined relationship with the rest of america
