surveys the pre christian beliefs of the scandinavian and germanic peoples provides an introduction to this subject giving basic outlines to the sagas and stories and helps identify the character traits of not only the well known but also the lesser gods of the age

most people know of valhalla the world tree and the gods of norse mythology or the strange hunts and voyages of the ancient Irish tales yet few people realise the significance of the similarities and contrasts between the religions of the pre christian people of north western

Europe the Celts and Germans and Scandinavians had much in common in their religious practices and beliefs and this is the first serious attempt that has been made to compare them. There are striking resemblances in their ideas about battle goddesses and protective spirits, holy places, sacrificial rituals, divination and ideas about the other world and myths and symbols. In Pagan Europe poses questions like: do such parallels go back to early times or are they owing to late Viking contact? Hilda Ellis Davidson has worked for many years on pre-Christian Scandinavian and Germanic religion and now compares them with the Celts from the background of previous studies using evidence from archaeology, iconography, later literature and folklore in a search for basic patterns which will add to our knowledge of the early peoples in Europe. Aimed at teachers and libraries but also accessible to students of history, religion and Celtic, Norse and German languages and cultures.

Mankind has given a recognizable face to the awesome and impalpable forces of nature in the image of the Green Man and the nature spirits. That this book explores the ways in which different societies and different craftsmen have depicted these spirits displays the wide creative range of the human imagination. But the persistence of the theme suggests that in all their many facets these spirits represent a deep primordial sense that humans have shared since civilization began. For the very origin and message of these images have remained the same even if somewhat altered over time. Traditional customs from around the world, from the rites that celebrate spring and egg on the forces of fertility to folk health remedies and the use of talismans to ward off illness and other evils, show some surprising similarities and hint at the shared origins of human culture. Even though the original significance of many customs has been lost or diluted, they still hold an appeal and many towns even today are re-introducing seasonal fairs to recreate the link between man and nature. Varner presents examples ancient and new from Europe and Asia, East Coast and West, and identifies in particular the different guises of the Green Man who has figured in architecture since before the advent of Christianity and still makes his appearance today peering out from behind his leaves on California banks and New York brownstone houses.

Grinsell, Christina Hole, Venetia Newall, Geoffrey Parrinder, Anne Ross, Jacqueline Simpson, Beatrice White, John Widdowson. Originally published in 1973.
