w r d fairbairn 1889 1964 challenged the dominance of freud's drive theory with a psychoanalytic theory based on the internalization of human relationships fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect insensitivity and outright abuse that are impossible for the children to tolerate consciously in fairbairn's model these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents attachment is paramount in fairbairn's model as he recognized that children are absolutely and unconditionally dependent on their parents kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence at the heart of fairbairn's model is a structural theory that organizes actual relational events into three self and object pairs one conscious pair the central ego which relates exclusively to the ideal object in the external world and two mostly unconscious pairs the child's antilibidinal ego which relates exclusively to the rejecting parts of the object and the child's libidinal ego which relates exclusively to the exciting parts of the object the two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual's central ego when they emerge the other is misperceived as either an exciting or a rejecting object thus turning these internal structures into a source of transferences and reenactments fairbairn's central defense mechanism splitting is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego a near perfect model of the borderline personality disorder in this book david

celani reviews fairbairn's five foundational papers and outlines their application in the clinical setting he discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview incorporating decades of experience into his analysis celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic obsessive and borderline personality disorders

in their groundbreaking *A Primer of Object Relations* jill savege scharff and david e scharff answered readers' questions about this burgeoning field in remarkably clear and readable prose it is difficult to imagine any other team of authors who could provide such a comprehensive survey of the broad applications of object relations theory and in the second edition of this authoritative work the scharffs draw from their years of clinical experience to create an inclusive and up-to-date manual for object relations theory that is certain to become a classic in the field

this book is a synthetic historiography of present-day international relations theory a critical analysis of the continuing diversity and complexity of enduring themes through a sustained

focus on the analysis of the empirical evidence accumulated by social scientists special attention is given to key historical changes in theoretical approaches over the past half century with full recognition of the contestation over state based theory and the changing fortunes of contemporary approaches the book suggests that viable theories must transcend current intellectual fashion and attempts to bring together theory and practice while demonstrating the difficulty of assessing competing theories it addresses multiple strands of thought and assumes that their development cannot be understood in isolation from each other

this controversial set of essays evaluates and extends international relations theory in light of the revolutionary events of past years the contributors demonstrate how theoretical constructs did not anticipate soviet foreign policies that led to the end of the cold war

given that the world has moved well beyond the period of western colonialism and clearly into a durable period in which non western cultures have gained their political autonomy it is long past time that non western voices had a higher profile in debates about international relations not just as disciples of western schools of thought but as inventors of their own approaches western ir theory has had the advantage of being the first in the field and has developed many valuable insights but few would defend the position that it captures everything we need to know about world politics in this book acharya and buzan introduce non western ir traditions to a western ir audience and challenge the dominance of western theory an international team of experts reinforce existing criticisms that ir theory is western focused and therefore misrepresents and misunderstands much of world history by introducing the reader to non western traditions literature and histories relevant to how ir is conceptualised including case studies on chinese japanese south korean southeast asian indian and islamic ir this book redresses the imbalance and opens up a cross cultural comparative perspective on how and why thinking about ir has developed in the way it has as such it will be invaluable reading for both western and asian audiences interested in international relations theory

international law is playing an increasingly important role in international politics however international relations theorists have thus far failed to conceptualise adequately the role that law plays in politics instead ir theorists have tended to operate with a limited conception of law an understanding of jurisprudence and legal methodology is a crucial step towards achieving a better account of international law in ir theory but many of the flaws in ir s idea of law stem also from the theoretical foundations of constructivism the school of thought which engages most frequently with law adriana sinclair rehabilitates ir theory s understanding of law using cases studies from american english and international law to critically examine contemporary constructivist approaches to ir and show how a gap in their understanding of law has led to inadequate theorisation
