rethinking leviathan offers a new approach to the history of the modern state it concentrates on the eighteenth century and on two cases those of britain and germany these two countries have always been test cases for historians and social scientists looking at the development of the modern state because they have been seen as presenting the two main alternatives in the state building process using a comparative study of the british and german states including prussia it deconstructs certain clichés about them and forces us to rethink how to study states in the early modern era the volume is less concerned with the theory of the state or the formal constitutional conditions under which governments operate than with their actual modus operandi the subjects covered in this volume include some which have so far been ignored in reconstructing the history of the

focusing on eighteenth century cultural productions wendy sutherland examines how representations of race in philosophy anthropology aesthetics drama and court painting influenced the construction of a white bourgeois german self sutherland positions her work within the framework of the transatlantic slave trade showing that slavery colonialism and the triangular trade between europe west africa and the caribbean function as the global stage on which german bourgeois dramas by friedrich wilhelm ziegler ernst lorenz rathlef and theodor körner and a novella by heinrich von kleist on which körner's play was based were performed against a backdrop of philosophical and anthropological influences plays had an important role in educating the rising bourgeois class in morality sutherland argues with fathers and daughters offered as exemplary moral figures in contrast to the depraved aristocracy at the same time black female protagonists in nontraditional dramas represent the boundaries of physical beauty and marriage eligibility while also complicating ideas of moral beauty embodied in the concept of the beautiful soul her book offers convincing evidence that the eighteenth century german stage grappled with the representation of blackness during the age of goethe even though the german states were neither colonial powers nor direct participants in the slave trade

in 1767 more than a century before germany was incorporated as a modern nation state the city of hamburg chartered the first deutsches nationaltheater what can it have meant for a german playhouse to have been a national theater and what did that imply about the way these theaters operated michael sosulski contends that the idea of german nationhood not only existed prior to the napoleonic wars but was decisive in shaping cultural production in the last third of the eighteenth century operating not on the level of popular consciousness but instead within representational practices and institutions grounding

his study in a foucauldian understanding of emergent technologies of the self sosulski connects the increasing performance of body discipline by professional actors soldiers and schoolchildren to the growing interest in german national identity the idea of a german cultural nation gradually emerged as a conceptual force through the work of an influential series of literary intellectuals and advocates of a national theater including g e lessing and friedrich schiller sosulski combines fresh readings of canonical and lesser known dramas with analysis of eighteenth century theories of nationhood and evolving acting theories to show that the very lack of a strong national consciousness in the late eighteenth century actually spurred the emergence of the german nationaltheater which were conceived in the spirit of the enlightenment as educational institutions since for germans nationality was a performed identity theater emerged as an ideal space in which to imagine that nation
