the mad minute takes the dull out of the drill allowing students to achieve instant recall of number facts after only six to eight weeks of working one minute a day

dr shoecraft may be the only mathematician since the new math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it his breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains by teaching the essence of arithmetic in sensible ways and

appealing to children's love of games songs and movement he's proven that virtually all children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music when children understand arithmetic they own it it's no longer just their teacher's math it's their math america's children are being held back in math because of how arithmetic is drug out in elementary school virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade the reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized research shows that the human brain is not designed to remember things learned by rote when no longer practiced that's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't you know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number every child can understand base ten numeration when taught hands on with arithmetic blocks thereby every child can understand base ten arithmetic and every child can learn how to count out the number facts like $5 + 7 = 12$, $17 - 8 = 9$, $6 \times 7 = 42$ and $56 \div 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong what matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

millions of novice teachers will be entering classrooms over the next few years unfortunately due to feeling overwhelmed frustrated and unsuccessful many of these teachers will not stay in education if we are to succeed in staffing our schools with effective teachers educational leaders must do a better job of supporting these teachers early in their careers one form of support we can improve is the teacher induction process in combination with the book from first year to first rate this book provides all of the material necessary to provide a comprehensive systematic multi year teacher induction program through reflective activities teachers that participate in this program will establish proficiency with classroom management professionalism assessment and instruction

now it's easy to locate the materials you need to implement the new nctm math standards organized by such math topics as problem solving estimation number sense and numeration and geometry and spatial relationships this book shows users where to find manipulatives and materials such as attribute blocks pattern blocks clocks scales multilink cubes and prisms calculators and sorting toys it also lists specialized math books computer software and a host of other learning materials e.g. activity cards puzzles posters games reproducibles the author briefly describes each product cites grade level when given and explains possible applications products of exceptional quality and value are highlighted and the addresses of publishers and suppliers are given a real time saver grades k-4

this revision of bloom's taxonomy is designed to help teachers understand and implement standards based curriculums cognitive psychologists curriculum specialists teacher educators and researchers have developed a two dimensional framework focusing on knowledge and cognitive processes in combination these two define what students are expected to learn in school it explores curriculums from three unique perspectives cognitive psychologists learning emphasis curriculum specialists and teacher educators c i emphasis

and measurement and assessment experts assessment emphasis this revisited framework allows you to connect learning in all areas of curriculum educators or others interested in educational psychology or educational methods for grades k 12

the mad minute takes the dull out of the drill allowing students to achieve instant recall of number facts after only six to eight weeks of working one minute a day
