the sustainability and architecture of today's European welfare states and social security systems are under pressure in addition to general trends such as individualization, ageing and migration. The very process of European integration and globalization drives welfare states to reform. In this collection of essays five leading foreign welfare state experts reflect on the nature of the Dutch welfare state in a changing Europe. Comparative commentary from abroad provides policy wisdom as well as illuminating asides about national debates. These reflections from experts of neighboring countries Germany, France, the United Kingdom and Belgium and the United States focus on various aspects of the Dutch welfare state such as social security, labor market policy, health care and immigration and carry the intellectual discussion of a pressing political issue across borders. In this way the book contributes to the political debate on the future of the welfare state in the European context. It offers an interesting and provoking mosaic of the Dutch welfare state during the past two decades. At the same time it reveals the important questions and dilemmas the Netherlands will have to cope with in the years to come. The observations and insights enrich the debate about the future of social policy in the Netherlands and in the European Union as a whole.

The European Commission calls on euro area members to reduce public deficits and debts taking advantage of the current robust economic growth. In 2006 the euro area economy saw its fastest growth rate since 2000. Employment also grew, pushing the overall number of new jobs created since 1999 to 10 million more than generated in the US in the same period.
