this book is intended to fill a knowledge gap in the study of contemporary high rise living while there has been much documentation on the engineering and technological aspects of tall buildings relatively little has been written about the social and livability of high rise much less is written about asian cities even though asia is the current hotbed of high rise development even though traditional discourse of high rise housing is not always positive new forces are redefining its place in 21st century urbanity many cities around the world are reembracing high rise in urban agenda under current narrative of sustainable

development high rise is fast becoming a priority area in international research agenda the quest is for livable and sustainable high rise development against the background of current trends globalization urbanization mixed use development and new built taller buildings in inner city areas in both developed and developing countries this book examines the software design economics estate management legal and property rights physical environment planning community development and social dimensions of high rise living analysis is with the widely acclaimed successful high rise public housing in hong kong and singapore to understand the advantages and worries of high rise living and to distill the key points and lessons in the making of a good highrise living environment hong kong and singapore have been constructing high rise for more than four decades each the majority of their population has moved to live in high rise selecting to live high rise and registering consistently high residential satisfaction the height of apartment buildings in both cities continues to rise the tallest is anticipated to be 70 storey it is the contention of this book that contrary to earlier common negative discourses on public high rise living the high rise environment may yet offer urban residents a satisfying dwelling experience leading housing academics researchers and practitioners in the two cities have contributed to this book this book presents a timely contribution to our understanding of a widening urban phenomenon that will affect a growing number of the world s population

with special reference to hyderabad city india

papers presented at the international symposium on earthquake relief in less industrialized areas zurich 28 30 march 1984

contains biographical sketches of representative british novelists whose work began to appear roughly around 1960
