this note examines the transmission of credit risk of banks to the sovereign using the  
collapse of the silicon valley bank in march 2023 an event that reverberated globally

across banking sectors as an exogenous shock to identify the effect the findings suggest a strong transmission of credit risk from the banking sector to the sovereign in the united states as well as in other major economies in the face of adverse shocks to the banking sector this impact is more pronounced in economies with higher public debt relative to gdp greater exposure of the banking sector to domestic sovereign debt and less well capitalized banking systems these results suggest that investors view banking sector stress as particularly economically costly for such countries

at the interface of biology chemistry and materials science this book provides an overview of this vibrant research field treating the seemingly distinct disciplines in a unified way by adopting the common viewpoint of surface science the editors themselves prolific researchers have assembled here a team of top notch international scientists who read like a who s who of biomaterials science and engineering they cover topics ranging from micro and nanostructuring for imparting functionality in a top down manner to the bottom up fabrication of gradient surfaces by self assembly from interfaces between biomaterials and living matter to smart stimuli responsive surfaces and from cell and surface mechanics to the elucidation of cell chip interactions in biomedical devices as a result the book explains the complex interplay of cell behavior and the physics and materials science of artificial devices of equal interest to young ambitious scientists as well as to experienced researchers
