excerpt from the concept of morals in morals finally we have the doctrine of ethical relativity it is the same story over again morality is doubtless human it has not descended upon us out of the sky it has grown out of human nature and is relative to that nature nor could it have apart from that nature any meaning whatever this we must accept but if this is interpreted to mean that whatever any social group thinks good is good for that group that there is no common standard and that consequently any one moral code is as good as any other then this relativism in effect denies the difference between good and evil altogether and makes meaningless the idea of progress in moral conceptions about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important

originally published in 1970 the papers in this volume discuss the essential and defining characteristics of morality and moral issues and examine how moral views differ from political views moral beliefs from religious beliefs and moral judgements from aesthetic judgements some of the chapters discuss problems of method and shed light on the complex conditions which any successful definition of morality must satisfy taken collectively these papers reflect the wide variety of approaches adopted by contemporary philosophers

this book is a philosophical introduction to ethics it differs from existing texts by focusing on a basic philosophical

problem about morality its apparent immunity from observational testing other texts either ignore this issue altogether in order to concentrate on interesting but largely nonphilosophical discussions of moral problems or treat the issue as only one of several highly technical questions in something called meta ethics
