many books have covered the topics of architecture materials and technology new  
architecture and technology is the first to explore the interrelation between these  
three subjects it illustrates the impact of modern technology and materials on  
architecture the book explores the technical progress of building showing how  
developments both past and present are influenced by design methods it provides  
a survey of contemporary architecture as affected by construction technology it

also explores aspects of building technology within the context of general industrial social and economic developments the reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design

timber the old raw material and building material returns there are many reasons today for building with wood and there are great advantages over conventional designs wood is not only a renewable building material that helps reduce the levels of co2 and is hence good for climate change but due to modern computing and manufacturing processes it can also be used for a variety of construction tasks wood possesses excellent qualities for both construction and indoor climate control and can easily be combined with other common building materials based on 24 international projects the book provides an overview of the range of possibilities in wood construction today texts images and plans document the architectural and constructive qualities of contemporary timber structures from the conceptual design to the structure in detail the various uses are based on current research in modern timber engineering but also on timber construction expertise that has been developing over many centuries this special discipline has evolved significantly in recent decades particularly in germany austria and switzerland and is a world leader today

the complete story of behrens contribution to the history oftentieth century architecture

have you ever wondered how the ideas behind the world s greatest architectural designs came about what process does an architect go through to design buildings which become world renowned for their excellence this book reveals the secrets behind these buildings he asks you to read the building and understand its starting point by analyzing its final form through the gradual revelations made by an understanding of the thinking behind the form you learn a unique methodology which can be used every time you look at any building

through the brilliant photography of richard schulman and an insightful introduction by new yorker critic paul goldberger portraits of the new architecture celebrates the 50 architects who have reinvented architecture in the 20th and 21st centuries from philip johnson and i m pei to richard meier and daniel liebeskind portraits emphasizes the magnetism of the architects as well as their creations with highly personalized representations of the architects themselves and images and design plans of their best work the book explores the architect as superstar phenomenon what does it mean that architecture today has become a style statement illustrated

includes special issues and extra issues
