this book discusses the principles methods and applications of immunogold silver staining igss to
biomedical areas it focuses on the latest advances in the dynamic and progressive field of igss

since antibodies tagged with markers have been developed immunocytochemistry has become the
method of choice for identifying tissue substances or for the localisation of nucleic acid in tissue by
in situ hybridisation resin embedded tissue is routinely used and new techniques are constantly
introduced thus the novice entering these fields has a breathtaking variety of methods open to him
this labmanual covers the embedding of tissue using epoxy resin methods to the more sensitive
procedures employing the acrylics the possibilities and results are discussed so that an
understanding of the techniques can be acquired and appropriate choices made the various resins
available and all steps involved in tissue processing beginning with fixation as well as the great variety
of labelling methods and markers that are commonly used for on section cytochemistry and
immunocytochemistry are described including detailed protocols for the application
