Emmett contributes to missional pentecostal historiography through bringing a pre-eminent figure in early British pentecostalism into the limelight. He shows how pentecostalism in Belgian Congo was pioneered by W. F. P. Burton alongside local agency. Central to Burton's contradictory and complex personality was a passionate desire to see the emancipation of humankind from the spiritual powers of darkness, believing only spirit-empowered local agency would enduringly prove effective. Burton's faith believed for spirit intervention in church communities, converting lives, bringing physical healing, and transforming regions in the maelstrom following Congolese independence. Burton's belief in his own brand of indigenisation made him an outlier even among pentecostals. Burton's pentecostal faith engendered an idealism which frustratingly conflicted with those not sharing it in the way he pursued it. This book thus serves pentecostals and historians by clarifying Burton's ideals and revealing the reasons for his frustrations.

This two-volume set (Incs 12194 and 12195) constitutes the refereed proceedings of the 12th International Conference on Social Computing and Social Media (SCSM 2020) held as part of the 22nd International Conference on HCI International 2020, which was planned to be held in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. The total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings from a total of 6326 submissions. SCSM 2020 includes a total of 93 papers which are organized in topical sections named: Design Issues in Social Computing; Ethics and Misinformation in Social Media; User Behavior and Social Network Analysis; Participation and Collaboration in Online Communities; Social Computing and User Experience; Social Media Marketing and Consumer Experience; Social Computing for Well-being; Learning and Entertainment.

The growth of global pentecostalism in the past century has been studied and documented from many perspectives. Its leadership culture and ecclesiology, however, has received scant academic and theological attention. This book, based on an extensive research study of the Assemblies of God of Great Britain (AOG), could not be more timely. Conducted as AOG entered its centenary decade and faced the challenges that its historic culture and leadership dynamics posed, the leadership struggles discussed in this book will resonate with any denomination that has grown or wrestled with polity, leadership, and culture.

ICIEMS 2015 is the conference. Its aim is to provide a platform for researchers, engineers, academicians, as well as industrial professionals from all over the world to present their research results and development activities in engineering technology, industrial engineering, application level security, and management science. This conference provides opportunities for the delegates to exchange new ideas and application experiences face-to-face to establish business or research relations and to find global partners for future collaboration.
