may 28 2021 i have recently come across the code `gt` in `r` it is a vertical line character pipe followed by a greater than symbol here is an example

```
mtcars |> head
```

what is the `gt` code

nov 25 2014 i have seen the use of `gt_percent` greater than `percent` function in some packages like `dplyr` and `rvest` what does it mean is it a way to write closure blocks in `r`

```
##### rstudio #####
##### r #####
##### gnu #####
```

for boolean values there is no difference between bitwise and logical operations but for arbitrary integers the result differs for instance 1 & 2 & 3 in most programming languages however this is

a carriage return `r` makes the cursor jump to the first column begin of the line while the newline `n` jumps to the next line and might also to the beginning of that line

jan 14 2026 i m using r 4 5 2 with rstudio 2026 01 0 build 392 under windows 11 using defender for protection in spite of giving r and rstudio access to all controlled folders i find debugging impossible

the infix operator is not part of base r but is in fact defined by the package magrittr cran and is heavily used by dplyr cran it works like a pipe hence the reference to magritte s famous
