the interest in the field of active flow control afc is steadily increasing in cent years the number of conferences and special sessions devoted to afc org ized by various institutions around the world continuously rises new advanced courses for afc are offered by the american institute of aeronautics and ast nautics aiaa the european research community on flow turbulence and combustion ercoftac the international

centre for mechanical sciences cism the von karman institute for fluid dynamics vki to name just a few new books on afc are published by prominent colleagues of our field and even a new periodical the international journal of flow control appeared despite these many activities in afc it was felt that a follow up of the highly successful active flow control conference held in berlin in 2006 was appropriate as in 2006 active flow control ii consisted only of invited lectures to sti late multidisciplinary discussions between experimental theoretical and numerical fluid dynamics aerodynamics turbomachinery mathematics control engineering metrology and computer science parallel sessions were excluded unfortunately not all of the presented papers made it into this volume as the preparation and printing of a book takes time and as this volume should be available at the conference the local organizing committee had to set up a very ambitious time schedule which could not be met by all contributors
