since the end of the cold war the world has been faced with new regional conflicts terrorism and threats from the proliferation of weapons of mass destruction and from rogue states the world remains uncertain unstable and insecure with continued threats to global peace and security the world economic crisis has also threatened government spending with defence as a candidate for spending cuts choices have to be made about the size of a nation s defence budget its allocation between nuclear and conventional forces between equipment and personnel and between air land and sea forces major reductions in defence spending and the challenge of maintaining security with increasingly limited resources will confront the defence budgets of all nations this book identifies the typical questions raised by economists when studying defence policy shows how simple economic analysis can be used to answer these questions and provides a critical evaluation of defence policy controversial and illuminating this pioneering work subjects the myths emotion and special pleading which dominate defence debates to the close scrutiny of economic analysis and critical appraisal it identifies the range of choices facing all governments with examples taken from the uk europe and the usa

this valuable contribution should be of interest to postgraduates and researchers focusing on defence economics as well as those working in the military or defence ministries

despite their growth outlined and analysed in this book the claims and counter claims that surround offsets have not been subjected to critical scrutiny by economists this book fills that gap it brings together a team of internationally renowned specialists to document and evaluate the economic impact of several countries offset policies in addition the papers by industrialists and defence officials yield further insights which help to tease out which of the claims made for offsets do not stand critical scrutiny

this book makes an original contribution to our knowledge of the world's major defence industries experts from a wide range of different countries from the major economies of north america and western europe to developing economies and some unique cases such as china india singapore south africa and north korea describe and analyse the structure conduct and performance of the defence industry in that country each chapter opens with statistics on a key nation's defence spending its spending on defence r d and on procurement over the period 1980 to 2017 allowing for an analysis of industry changes following the end of the cold war after the facts of each industry the authors describe and analyse the structure conduct and performance of the industry the analysis of structure includes discussions of entry conditions domestic monopoly oligopoly structures and opportunities for competition the section on conduct analyses price non price competition including private and state funded r d and performance incorporates profitability imports and exports together with spin offs and technical progress the conclusion explores the future prospects for each nation's defence industry do defence industries have a future what might the future defence firm and industry look like in 50 years time this volume is a vital resource and reference for anyone interested in defence economics industrial economics international relations strategic studies and public procurement

the second volume of the handbook of defense economics addresses defense needs practices threats and policies in the modern era of globalization this new era concerns the enhanced cross border flows of all kinds e g capital and labor flows revolutionary rhetoric guerrillas and terrorists including the spillovers of benefits and costs associated with public goods and transnational externalities i e uncompensated interdependencies affecting two or more nations these ever increasing flows mean that military armaments and armies are less able to keep out security threats thus novel defense and security barriers are needed to protect borders that are porous to terrorists pollutants political upheavals and conflicts even increased trade and financial flows imply novel

security challenges and defenses globalization also underscores the importance of a new set of institutions e g the european union and global governance networks and agents e g nongovernmental organizations and partnerships this volume addresses the security challenges in this age of globalization where conflicts involve novel tactics new technologies asymmetric warfare different venues and frightening weapons volume 2 contains topics not covered in volume 1 i e civil wars peacekeeping economic sanctions the econometrics of arms races conversion peace economics and the interface of trade peace and democracy volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge i e conflict analysis terrorism arms races arms trade military manpower and arms industries all of the main securities concerns of today are analyzed chapters are written by the leading contributors in the topic areas up to date surveys on the pressing defense issues theoretical empirical and policy issues coverage of theoretical and empirical studies of terrorism contributions by the leading researchers in the field of defense economics

first published in 1990 this is an authoritative account of defence spending and policy in both developing and developed countries the book provides case studies and comparative materiel for policy makers civil servants and military staffs throughout hte world it will also be of great use to students of economics politics international relations and policy studies

this element introduces students policy makers politicians governments and business people to this new discipline within economics it presents the recent history of the subject and its range of coverage traditional topics covered include models of arms races alliances procurement and contracting as well as personnel policies industrial policies and disarmament newer areas covered include terrorism and the economics of war and conflict a non technical approach is used and the material will be accessible to both economists and general readers

this major reference work is a comprehensive critical guide to the large and growing literature on the economics of defence disarmament and peace it covers the cost of defence spending and its effects on growth investment unemployment technical change and other aspects of a nation s economic performance it includes material on the determinants of defence spending namely defence budgets programme budgeting and procurement policy it also deals with the economic impact of arms limitation disarmament and the conversion from military production to products with peaceful uses

the economics of producing defense illustrated by the israeli case begins with an overview of the development of defense economics as a sub discipline of the general theory of economics and points at the new challenges it is facing in the post cold war era it focuses then on the supply side of defense economics presenting theoretical analyses and empirical findings related to the use of various inputs manpower domestically made defense products imported arms in providing national security most of the issues under discussion are further elucidated by examples from israel s experience as a small economy that faces continuously severe security problems israel s way of coping with defense economic issues may indeed forward some interesting lessons for a wider audience the principal aim of the book is to convince policy makers and the public at large of the contribution defense economics could make to more effective management of national security problems this aim is encouraged by the growing weight attached to economic considerations and consequences in producing and supplying defense as demonstrated in the detailed discussion

beyond the traditional two dimensional analyses of defense economics and defense politics lies a rapidly growing field of research the political economy of defense as the study of the interface between economics politics and defense proliferates this collective volume sets out to identify the nature of political economy of defense inquiry surpassing a narrower focus on the economic consequences of military spending the starting point for this collaborative effort was a series of panel discussions organized by andrew l ross in which most of the contributors to this volume participated the majority of chapters were written expressly for this book and have not been previously published these analytical and empirical investigations are intended to illustrate the broad encompassing scope of political economy of defense research and contribute to the development of a research agenda andrew l ross has brought together a timely and significant array of inquiry into the impact of defense spending on world politics and global economics this book will be of great interest to political scientists defense specialists and economists studying the military industrial complex

this book examines the impact defense spending has on economic growth while defense spending was not deliberately invented as a fiscal policy instrument its importance in the composition of overall government spending and thus in determining employment is now easily recognized in light of the collapse of the soviet union and the consequent reduction in the threat to the security of the united states maintaining defense spending at the old level seems indefensible the media has concentrated on the so called peace dividend however as soon as the federal government is faced with defense cuts it realizes the macroeconomic ramifications of such

a step based on studies included in this volume we examine the effects of defense spending on economic growth and investigate how the changed world political climate is likely to alter the importance and pattern of defense spending both for developed and developing countries
