Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India. It presents a new perspective on the principles and practices of early Indian architecture, defining it broadly over a range of space. The book argues for architecture as a form of cultural production as well as public consumption. Ten essays by leading archaeologists, architects, historians, and philosophers examine different architectural sites and landscapes, including Sanchi, Moodabidri, Srinagar, Chidambaram, Patan, Konark, Basgo, and Puri. They demonstrate the need to look beyond the built form to its spirit, beyond aesthetics to cognition, and thereby to integrating architecture with its myriad living contexts. The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building, both sacred and secular, which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form. The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis. This volume will be of interest to scholars and practitioners of architecture, ancient Indian history, philosophy, art history, and cultural studies.
