readers will agree fruits are some of the most popular and tastiest plant parts many people enjoy eating fruit but they may not know how fruits function as plant parts before they make their way to our kitchens readers are introduced to fun facts about fruits as they enhance their knowledge of beginner biology concepts they're also able to follow step by step instructions to take part in fun activities and try their hand at simple recipes vibrant full color photographs are included that make this learning experience a treat for young readers

reprint of the original first published in 1856

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

excerpt from fruit recipes a manual of the food value of fruits and nine hundred different ways of using them daniel had good reason for his famous and witty after dinner speech when he remarked to the lions after you gentlemen after you on the same principle prefaces are often postponed but i hope that you will read this one before dining that you may understand why such an anomaly as both a discussion of the food values of fruits and formulas for the practical preparation of fruit dishes should be offered men as well as women whatever mental attitude one may hold in relation to foods whether one makes meat the chief article of diet or excludes it or follows a middle course one uses fruit as one does water possibly as a luxury possibly only because other people use it but always to some degree unless one be an esquimau beyond even the reach of courageous arctic berries and always just as surely in lesser degree and with less appreciation of its real value than one should use it difference of age of climate of occupation or constitution make variation of kind and quantity of foods a necessity but generally speaking leaving out discussion of the three types of necessary food elements protein or nitrogen the carbohydrates including sugar and starches and fat all this aside it is agreed

that human beings as a class need more of the potash salts than they ordinarily realise or take into their systems about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
