this book makes it easy for you to find what effect environment has on the  
corrosion of metals and alloys however this volume offers information on  
additional environments including concrete soil groundwater distilled water  
sodium acetate and more thereas also updated and expanded coverage of  
previously discussed environments as well as information on environments  
which deal with the dairy food brewing aerospace petrochemical and  
building industries the environments are listed alphabetically each listing  
includes a general description of the conditions a comment on the corrosion

characteristics of various alloys in such a situation a bibliography of recent articles specific to the environment tables consolidating and comparing corrosion rates at various temperatures and concentrations for various alloys and graphical information also included are summaries on the general corrosion characteristics of major metals and alloys

provides a methodology for integrating materials selection with the design process including simultaneous technical and economic evaluation save hours of frustrating research time get fast answers about the best material for a particular application in the past researching the endless sources on corrosion and materials in their countless applications were next to impossible that s why this book was written to help simplify your materials selection problems it s an exhaustive source on the different corrosion resistant materials types of corrosion factors affecting corrosion passivation corrosion monitoring corrosion control measures methodology of materials selection and more

a corrosion data program sponsored by the national association of corrosion engineers and the national institute of standards and technology includes computer data base development to characterize the corrosion performance of engineering materials over a wide variety of environments and exposure conditions the important features of corrosion data are reviewed from both the data source and the user standpoints guidelines are provided for data input format development multiple source data compilation data validation and evaluation and interpretive data output schemes
