intergenerational justice the first part clarifies basic terms and traces back the origins of the idea of intergenerational justice it also focuses on the problem of intergenerational buck passing in the ecological context for example in relation to nuclear waste and the greenhouse effect at the same time it also sheds light on the relationship between intergenerational justice and economics addressing issues such as public debt and financial sustainability the innovative second part of the volume highlights how posterity can be institutionally protected such as by inserting relevant clauses into national constitutions reading this volume is the best way to gain an overall knowledge of intergenerational justice an extremely salient and topical issue of our time the handbook is an important contribution to the literature and will be of great interest to academics and graduate students as well as readers interested in wider human rights issues

focusing on contemporary social issues the environmental crisis population growth and demographic change and the question of whether reparations are owed to indigenous peoples this study presents a theory of intergenerational justice that gives citizens duties to past and future generations and explains what relationships between contemporary generations count as fair

is it fair to leave the next generation a public debt is it defensible to impose legal rules on them through constitutional constraints from combating climate change to ensuring proper funding for future pensions concerns about ethics between generations are everywhere in this volume sixteen philosophers explore intergenerational justice part one examines the ways in which various theories of justice look at the matter these include libertarian rawlsian sufficientarian contractarian communitarian marxian and reciprocity based approaches in part two the authors look more specifically at issues relevant to each of these theories such as motivation to act fairly towards future generations the population dimension the formation of preferences through education and how they impact on our intergenerational obligations and whether it is fair to rely on constitutional devices

can people alive now have duties to future generations the unborn millions if so what do

we owe them what does justice mean in an intergenerational context both between people who will coexist at some point and between generations that will never overlap in this book axel gosseries provides a forensic examination of these issues comparing and analyzing various views about what we owe our successors he discusses links between justice and sustainability and looks at the implications of the fact that our successors preferences are heavily influenced by what we will actually leave them and by the education they receive he also points to how these theoretical considerations apply to real life issues ranging from pension reform and brexit to biodiversity and the climate crisis he ends by outlining how intergenerational considerations may translate into institutional design anyone grappling with the dilemmas of our obligations to the future from students and scholars to policy makers and active citizens will find this an invaluable theoretical and practical guide to this moral and political minefield

development index rather than the metrics of utilitarian subjective happiness the book thus answers in detailed concrete terms the two most important questions of every theory of intergenerational justice what to sustain and how much to sustain ultimately this book provides a theory of intergenerational justice that is both intellectually robust and practical with wide applicability to law policy economics climate change and all other contexts that affect future generations

climate change poses questions of intergenerational justice but some of its features make it difficult to determine whether we have obligations of climate justice to future generations this book offers a novel argument justifying the present generation s obligations to future people livia ester luzzatto shows that we have intergenerational obligations because many of our actions are based on presuppositions about future people when agents engage in such intergenerational actions they also acquire an obligation to recognise those future people as agents within their principles of justice and with that a duty to respect their agency and autonomy intergenerational challenges and climate justice also offers a way to circumvent the problems of non identity and non existence its approach overcomes the intergenerational challenges of climate change by meeting three necessary criteria providing ways to cope with uncertainty dealing with the complexity of climate change and including future people for their own sake the author meets these criteria by adopting an action centred methodology that grounds our obligations of justice on the presuppositions of activity this robust framework can be used to justify increased climate action and the greater inclusion of future oriented policies in current decision making this book will be of great interest to academics and students concerned with the issues of climate and intergenerational justice

this book presents a contractualist theory of intergenerational justice that avoids deficiencies in existing igj theories e g the non identity problem and the under defining of generations the inability of social contract theory to provide a thorough accounting of justice between generations has been called an embarrassment and rightly so that said serious attempts have been made from a variety of contract perspectives to rectify the approach s shortcomings in the area of intergenerational justice one of the most prominent contract theorists john rawls attempted to address justice between generations in his theory via his just savings principle but both versions of it were met with stinging criticism as the climate crisis among other challenges presses the issue of justice for future generations the authors believe that intergenerational justice is something that social contract theory should and can address specifically they present a rawlsian approach that begins with a clarified understanding of what is meant by generations and proceeds from there to modify generational knowledge constraints in the original position the authors then draw upon the concept of indirect reciprocity to round out an argument for a rawlsian principle of justice between generations intergenerational fair equality of opportunity they then apply their intergenerational justice theory to five major public policy areas

professor weiss combines thorough research and careful analysis with imaginative

solutions and a moral fervor she shows how rules of international law can be applied in an intertemporal dimension and how the basic principles of the intergenerational equity can be developed to provide new standards for human behavior she manages to communicate to the reader not only that the situation is getting desperate but also that human intelligence can in time devise adequate remedies without destroying completely our way of life louis b sohn woodruff professor of international law published under the transnational publishers imprint
