from the preface my volume on the principles of sociology is described in the preface as an attempt to combine the principles of sociology in a coherent theory in plan and method the book is on the whole concrete rather than abstract consequently the theoretical propositions that it contains are scattered through many pages of descriptive and historical matter and are nowhere brought together in a didactic series it is therefore possible that not every reader of the volume has perceived the coherence of its theory and that classes using the book as a text have experienced a degree of difficulty in arranging its theoretical propositions in a consecutive order the theory assumes that certain adaptations of the individual to the physical world certain economic experiences ideas and activities and certain ethical experiences ideas and tendencies precede social life see the principles of sociology pp 41 45 100 103 239 the theory itself as distinguished from these presuppositions comprises the following propositions namely first certain affirmations about the modes of aggregation which bring individuals that are more or less alike into contact and acquaintance second certain propositions about the more important modes of resemblance which may be observed in any aggregation of individuals third propositions about a consciousness of similarity or of kind which it is alleged is the true cause of social phenomena fourth propositions about the reactions of association and of the consciousness of kind upon individual motives conduct and character fifth propositions about the organization of the consciousness of kind into a social mind and about its expression in social purpose and control sixth propositions about the laws of social choice seventh propositions about the establishment of definite social relations and

why do america s public schools seem unable to meet today s social challenges as competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education public schools were envisioned by the founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools this volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived it both establishes the intellectual foundation for revitalizing american schools and offers concrete ideas for how the educational process can be made more democratic the authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship an initial series of articles reexamines the original premise of american education as articulated by important thinkers like jefferson and dewey a second group identifies flaws in how schools are currently governed and offers

models for change a final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy it offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to america s future
