this book will help readers understand more about gerontological nursing how the different
nursing specialties interact and the necessity for multidisciplinary team approaches to improve
systems in the industry the book also highlights some of the many individuals who have
contributed to reaching for higher care levels in nursing homes innovative processes such as
the eden alternative and the quality indicator survey process are introduced which will assist
people to understand the wide range of ways in which the system can be improved as the
author emphasizes throughout the book the psychology of kindness is essential and needs to be
demonstrated by everyone in the gerontological field from care providers to families and
patients emotions can run high as patients and families may be frightened confused and
concerned about making good decisions while the care providers are themselves working hard
to provide appropriate care while coping with multiple demands consideration and humor are
in fact most important for creating a positive atmosphere for those in nursing homes
