this is the third and last book of a series on the bmw 3 series it is car that defines the sport sedan this book covers the fifth and sixth generations of cars the e90 and f30 both generations are very controversial with the e90 thanks to the chief designer chris bangle there were boldly aggressive changes to the iconic design the idrive interactive system confused many a driver even the supercar the m3 had a v8 engine which for many folks was like putting a moustache on the mona lisa despite all of this the 3 series grew and grew in popularity plus the magic drivability of the car remained in its dna for the present f30 generation bmw split the 3 series right down the middle the everyman s cars the sedan and wagon remained with the 3 series the coupe and convertible now part of the new 4 series are closer to the roots of the brand bmw tries to conquer all the sports car market with new unusual models and engines unthought of until very recently as the car world awaits the seventh generation of cars here is a review of the most reviewed ones

here is a quarter century look at the bmw model range during the period from the 3 series to the apex of the executive car the 7 series meredith also details in the 5 series 6 series and 8 series grand touring cars along the way the author concludes with the new generation of sporting cars the z range each model is test driven and critiqued by author

this is the story of the middle two generations of the 3 series the e36 and e46 generations by the start of the 1990s the sports sedan was an established car type just like the muscle car minivan or suv this is thanks to bmw which created the class with its first two generations of the 3 series every other car company had to have one especially makers of upscale automobiles therefore bmw had its hands full when it came time to create the third rendition of this class creating car so the company went out and boldly designed and built a completely new car the e36 as the third generation of 3 series is called the car reached a note of perfection in looks handling and choices this was despite the huge corporate problems bmw was having at the time the fourth generation of the 3 series the e46 was much more of a subtle change from the e36 this bit with bmw's philosophy of only making radical changes to its cars every other generation although not much different looking on the outside the newer generation 3 series now had even more features and options for the sports sedan buyer
