this collection of papers draws together a variety of approaches for adding object orientation to the z formal specification language these papers are not a conference proceedings but have a slightly more complicated history this work has grown and evolved from some work originally done in the zip project under the united kingdom's department of trade and industry dti led initiative zip is a three year project which aims to make the use of the z specification language more widespread it hopes to achieve this by producing a standard for zj developing a method for zj building tool support for zj and carrying out research into refinement proof and concurrency in z the zip methods work includes performing a survey of current z practitioners reported in barden et al 1992 j investigating current styles and methods of z usage j and developing a z method handbook available early in 1993 as part of this work we carried out a comparative study of the ways in which object orientation has been combined with z a summary of that work has been published as stepney et al 1992

includes entries for maps and atlases

the routledge handbook of sustainable urban transport offers a state of the art comprehensive overview of sustainable transportation modes impacts technologies and policy over time the economic benefits of transport have been overshadowed by negative externalities on the environment public health and communities today transport is one of the major contributors to greenhouse gas emissions and with the growth in the number and size of cities urban transport will be a critical infrastructure to develop sustainably sustainable urban transport poses a key topic of debate for politicians the public and transport providers worldwide as legacy vehicle technologies power sources infrastructure and habitual human travel behaviours render the decarbonisation of local and global transport systems inherently challenging featuring contributions from world leading international scholars the chapters examine concepts issues

and ideas across three topic areas that reflect the increasingly diverse nature of current research and thinking in sustainable urban transport sectors challenges issues and impacts and technical social and economic solutions each chapter provides an overview of current knowledge identifies issues discusses the relevant debates in sustainable urban transport and seeks to put forward a future research agenda in the field this handbook offers a single repository on the current state of knowledge written from a practical perspective utilising theory that is applied and developed using real world examples the handbook is an essential reference for researchers academics and students working in all areas of sustainable transportation from policy and planning to technology in addition to industry practitioners looking to develop their professional knowledge

construction history construction heritage recent construction historiography industrialization engineering sciences building materials building actors construction history is still a fairly new and small but quickly evolving field the current trends in construction history are well reflected in the papers of the present conference construction history has strong roots in the historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well this is reflected in these conference proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century the conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of construction history papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences the conference integrates perfectly into the daily work at the institute for preservation and construction history at eth zurich its two chairs the chair for building archaeology and construction history and the chair for construction heritage and preservation endeavor to cover the entire field and to bridge the gaps between the different approaches methodologies and disciplines between various centuries as well as technologies learning together and from each other the proceedings of 8icch give a representative picture of the state of the art in the field and will serve as a reference point for future studies

beginning with 1953 entries for motion pictures and filmstrips music and phonorecords form separate parts of the library of congress catalogue entries for maps and atlases were issued
