### 6 Overview of the U.S. Health Care System

The U.S. health care system is characterized by its decentralized nature, a spectrum of providers, and a mixture of public and private financing. Unlike single-payer systems such as those in Canada or the UK, the U.S. operates a predominantly market-based system with significant government involvement.

**Key Features:**

- **Pluralistic Structure:** Multiple entities, including government programs, private insurers, hospitals, clinics, and physicians, operate within the system.
- **Fragmentation:** Services are often delivered through disconnected entities, leading to challenges in coordination.
- **High Expenditure:** The U.S. spends more per capita on health care than any other country, with costs driven by advanced technology, administrative complexity, and high prices for services and pharmaceuticals.
- **Variable Access and Quality:** Disparities based on socioeconomic status, geographic location, and insurance coverage result

in unequal health outcomes. --- Organization of Health Care in the USA

The organization of American health care involves a layered structure comprising public programs, private insurance, health care providers, and regulatory agencies.

**Public Programs** Public health insurance programs serve specific populations and are funded by federal and state governments.

- **Medicare:** Established in 1965, Medicare primarily covers individuals aged 65 and older, as well as certain younger people with disabilities. It consists of parts that cover hospital (Part A), medical (Part B), and prescription drugs (Part D).
- **Medicaid:** Launched in 1965 alongside Medicare, Medicaid provides health coverage for low-income individuals and families. Its eligibility and benefits vary by state, with federal minimum standards.
- **Children's Health Insurance Program (CHIP):** Offers coverage for children in families with incomes too high for Medicaid but insufficient to afford private insurance.
- **VA and TriCare:** Specialized programs providing services for military personnel, veterans, and their families.

**Private Insurance** Most Americans receive health insurance through their employers or purchase it independently.

- **Employer-Sponsored Insurance (ESI):** The predominant source of coverage, often subsidized by employers.
- **Individual Market:** Private plans bought directly by consumers, often through marketplaces established under the Affordable Care Act (ACA).
- **Managed Care Plans:** Includes Health Maintenance Organizations (HMOs) and Preferred Provider Organizations (PPOs), which manage costs and coordinate care.

**Health Care Providers** Providers are the entities that deliver health services, including:

- **Hospitals:** Ranging from large academic medical centers to community hospitals.
- **Physicians and Specialists:** Practicing in private clinics or hospital settings.
- **Outpatient Clinics and Urgent Care Centers:** Providing non-emergency services.
- **Long-term Care Facilities:** Nursing homes and assisted living centers.

**Regulatory and Oversight Agencies** Multiple federal and state agencies oversee various aspects of health care:

- **Department of Health and Human Services (HHS):** Oversees Medicare, Medicaid, FDA, CDC, and other agencies.
- **Centers for Medicare & Medicaid Services (CMS):** Administers Medicare and Medicaid.
- **Food and Drug Administration (FDA):** Regulates pharmaceuticals, medical devices, and food safety.
- **State Departments of Health:** Manage licensing, regulation, and public health initiatives at the state level.

--- **Funding and Payment Mechanisms** The financial structure of U.S. health care is complex, involving multiple streams and payment models.

**Major Funding Sources**

- **Federal Government:** Funds Medicare, Medicaid, CHIP, and other programs, supplemented by dedicated taxes and general revenue.
- **State Governments:** Contribute to Medicaid and other public health initiatives.
- **Private Insurance Premiums:** Paid by individuals and employers.
- **Out-of-Pocket Payments:** Deductibles, copayments, and services not covered by insurance.
- **Philanthropy and Grants:** Support for public health and research.

**Payment Models** The way providers are paid greatly influences the organization and efficiency of care delivery.

- **Fee-for-Service (FFS):** Providers are paid for each service rendered; encourages volume but can lead to unnecessary procedures.
- **Capitation:** Providers receive a fixed amount per patient regardless of services; emphasizes cost control.
- **Value-Based Payments:** Incentivize quality and outcomes, blending FFS with performance metrics.
- **Accountable Care Organizations (ACOs):** Groups of providers sharing responsibility for patient outcomes and costs.
